

Motion Capture, Validation, and Vibration

Salam Rahmatalla

July 18, 2018

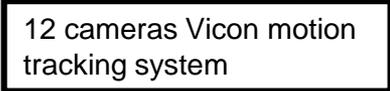

Facility Description (3D-Biomotion Research Lab)

16 cameras Motion Analysis tracking system

12 cameras Vicon motion tracking system

Inertia (Xsens) motion capture suit

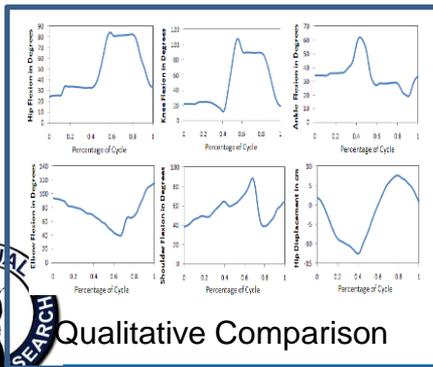

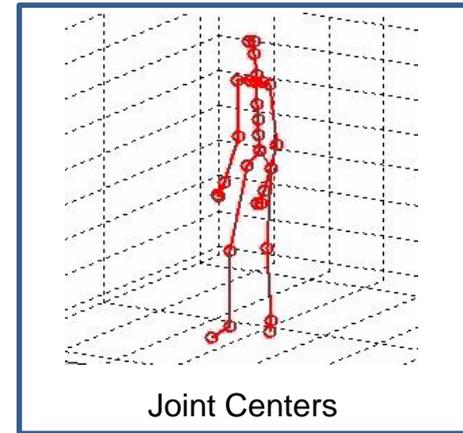

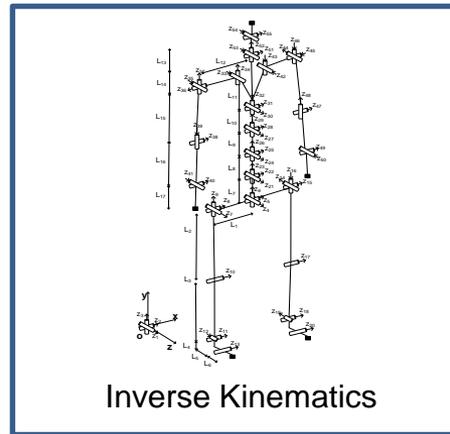

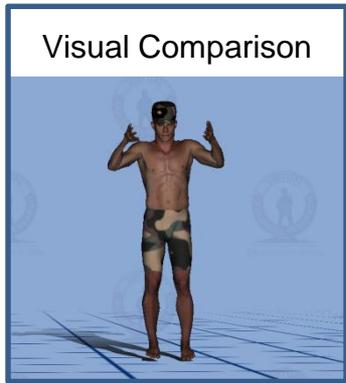

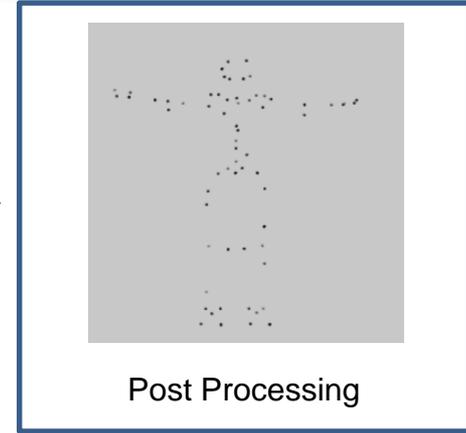

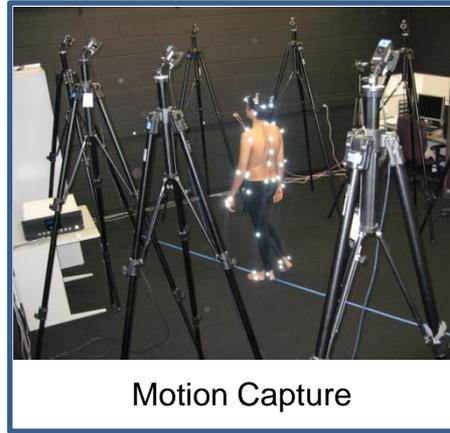

Mock-Up of a heavy construction machine

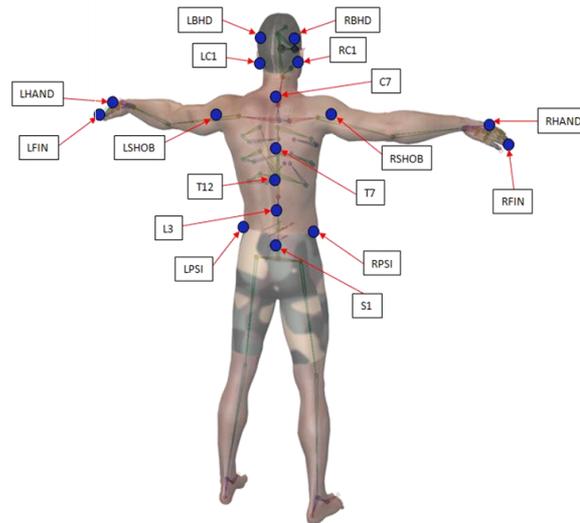

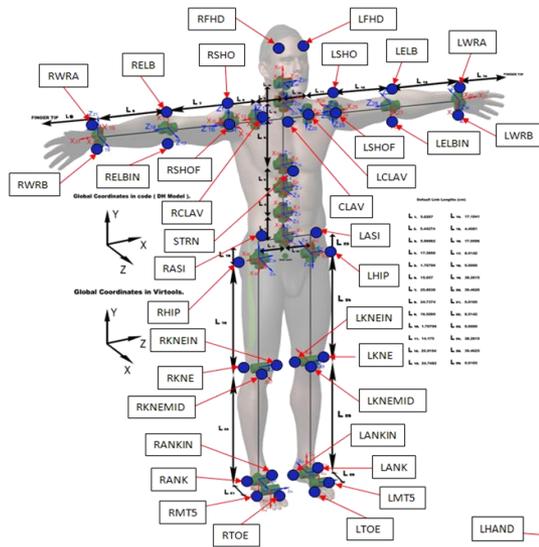

Six-degree of freedom Moog FCS motion platform

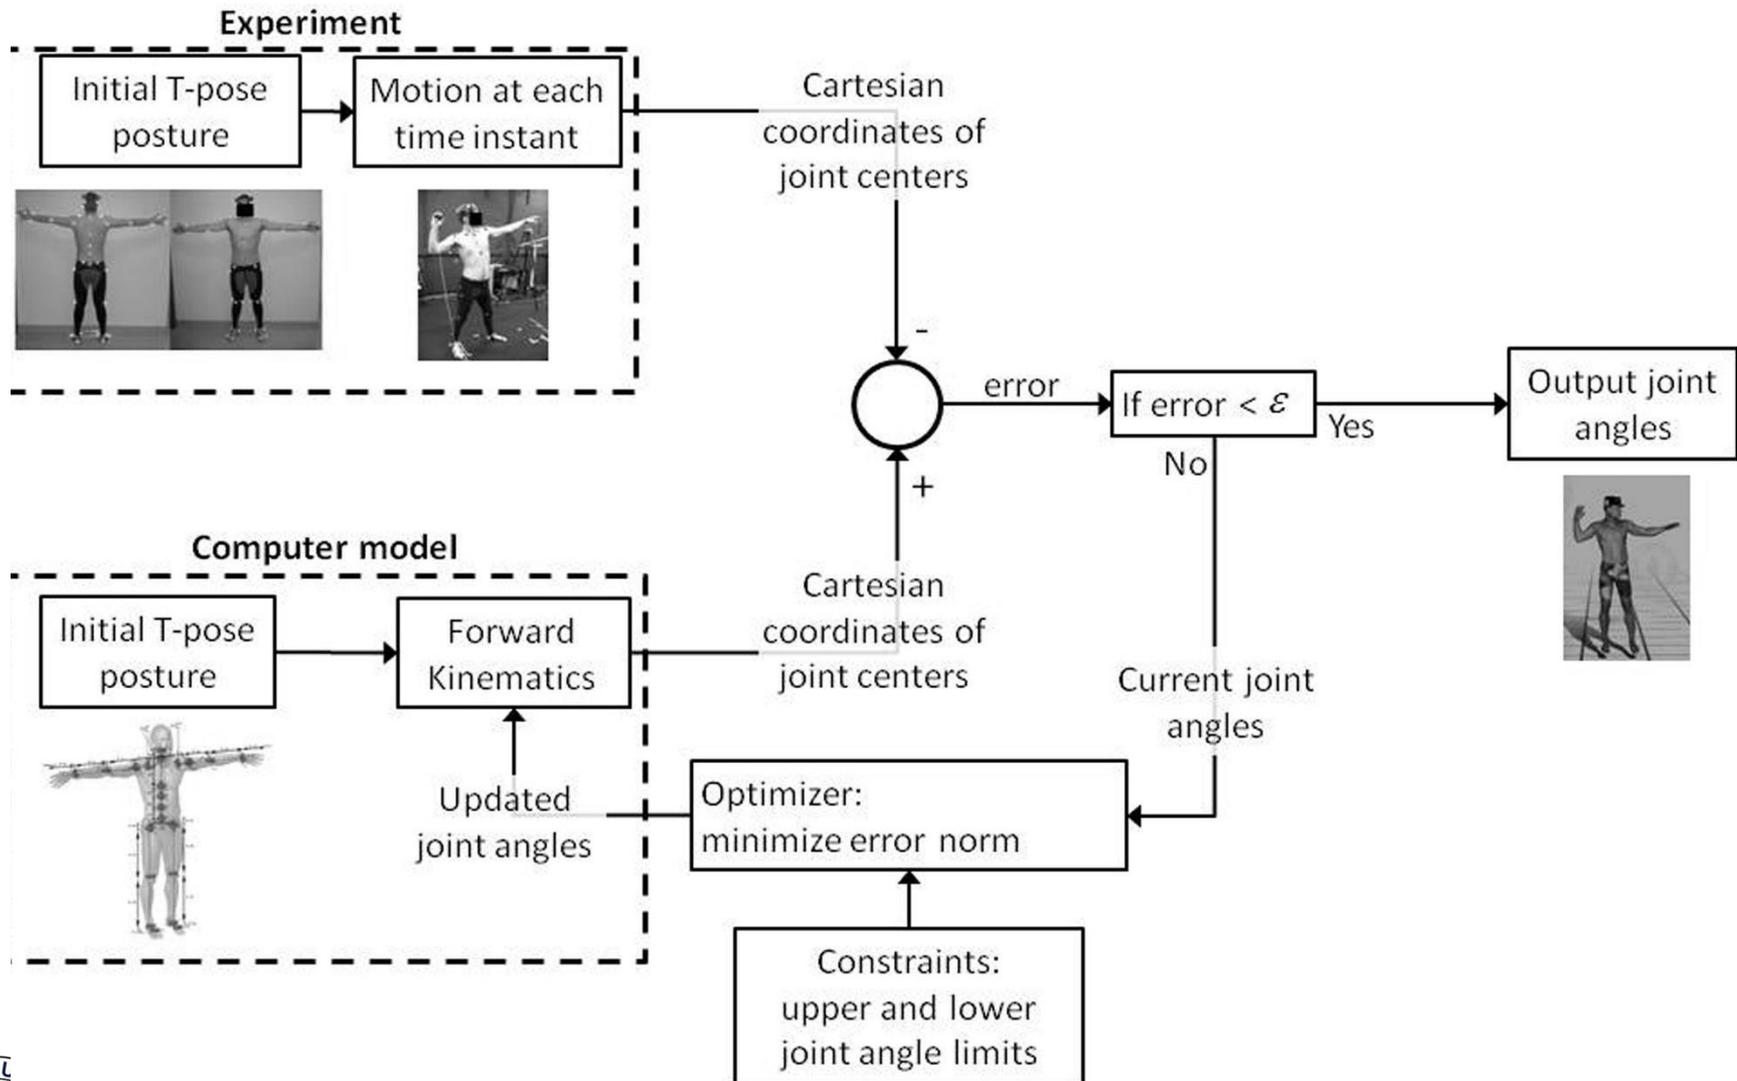

Motion Capture Process at CCAD

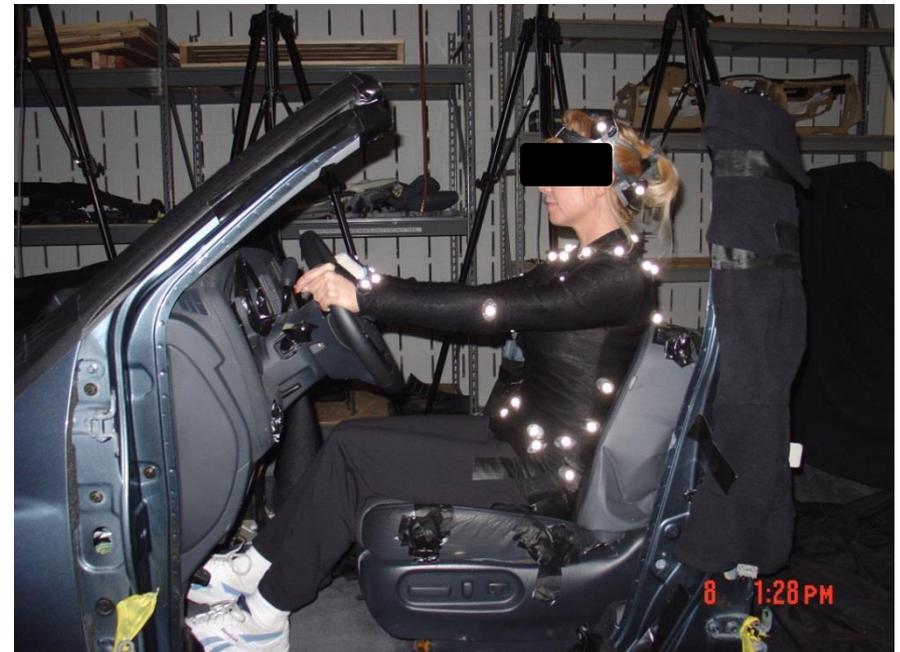

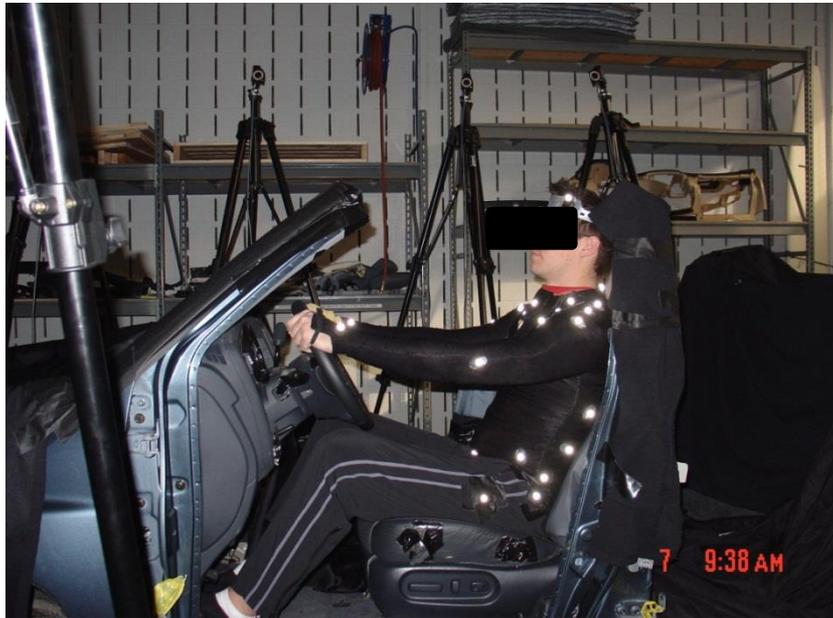

Motion Capture setup and marker protocols

In-House Inverse Kinematics for Santos

Whole-Body Posture Honda R&D

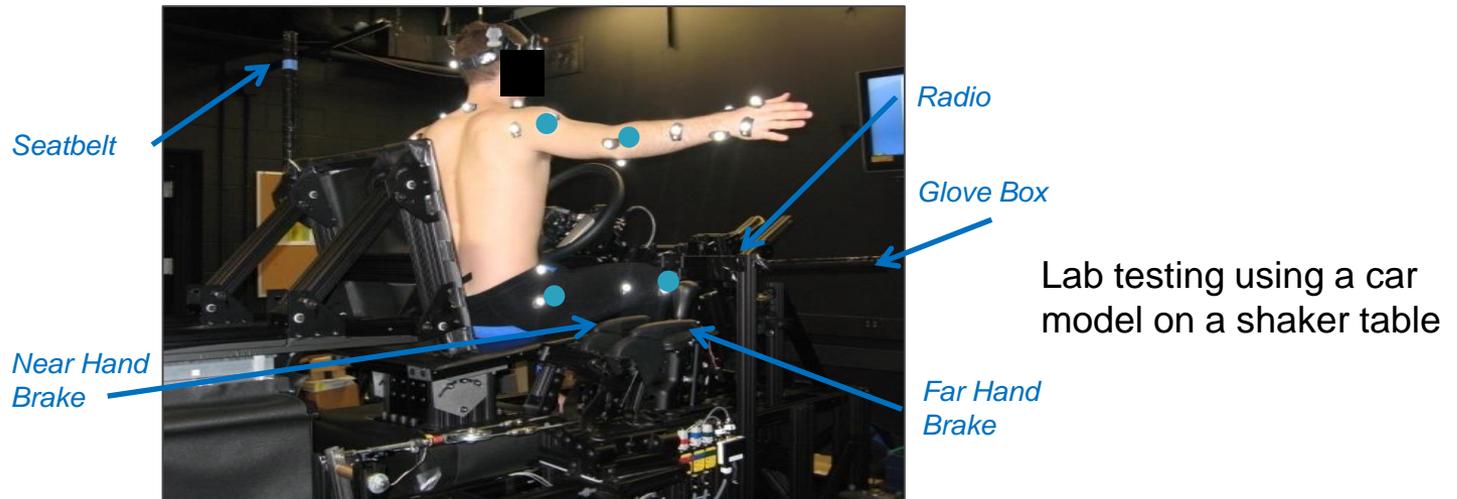

Motion Capture Evaluation Inside a Vehicle

Motion Capture research

Motion Capture Cameras Attached to the ceiling

Whole-Body Posture With and Without Load

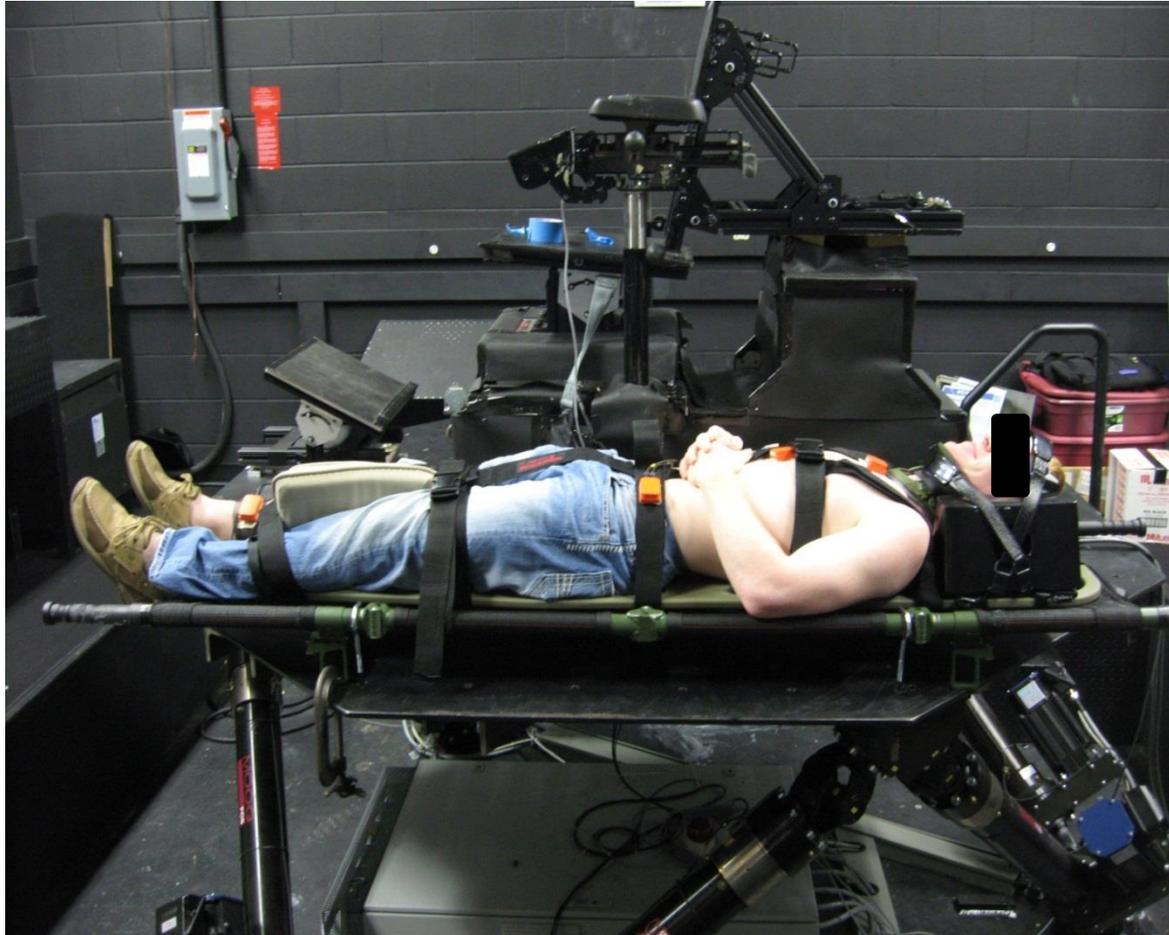

- Indicates joint center location
- ➔ Indicates target location for reaching task

Human Response to Whole-Body Vibration, Caterpillar Inc.

Motion capture studies in supine transportation, Collaborative work with EMS and USAARL

Task Determinants:

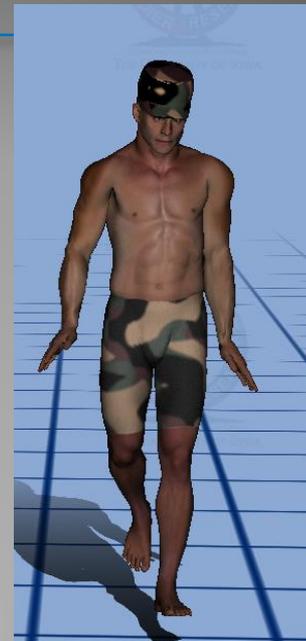

Joint angles that play a crucial role during the task

Example:

Based on the literature, there are six determinants that define normal walking:

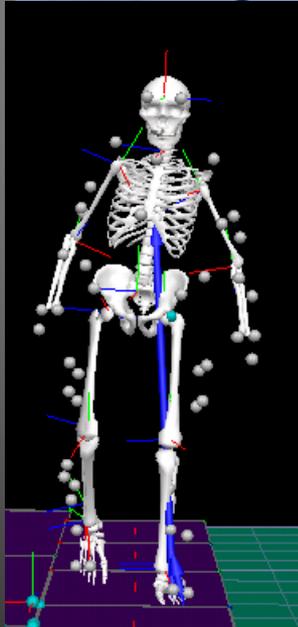

- Hip flexion/extension
- Knee flexion/extension
- Ankle plantar/dorsiflexion
- Pelvic tilt
- Pelvic rotation
- Lateral pelvic displacement

Application in Medical Field (Prosthetic Gait)

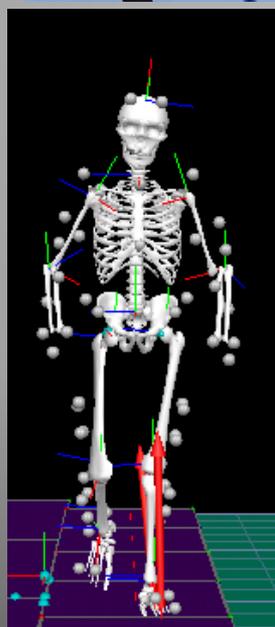

Military
Performance
Laboratory (MPL)

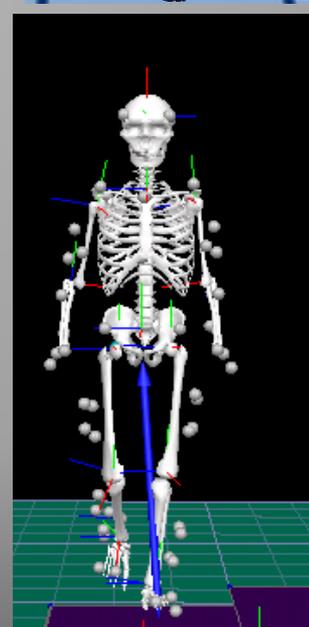

Santos

Femoral

Tibial

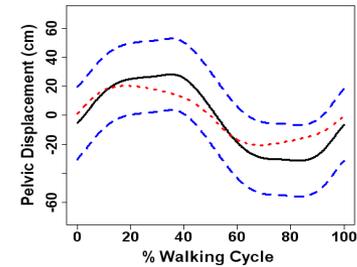

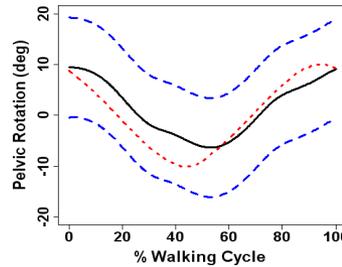

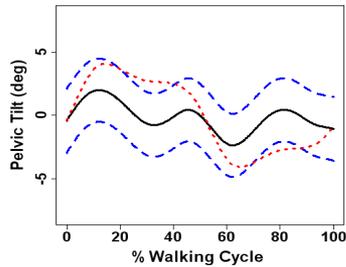

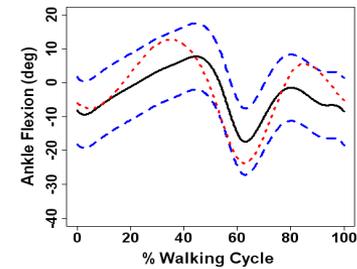

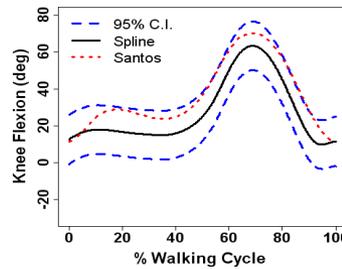

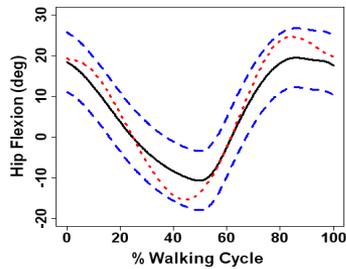

Control

Visual3D

Confidence Intervals

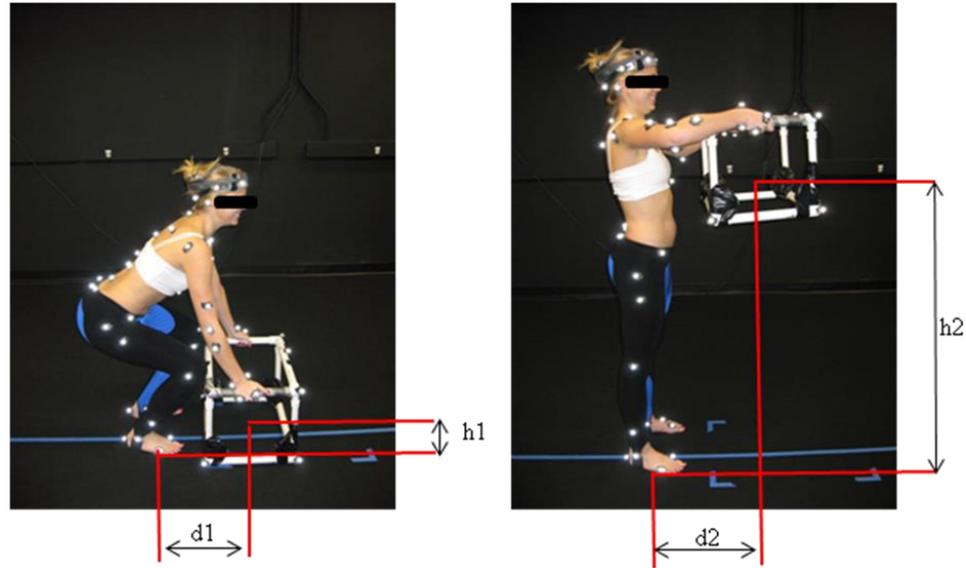

Quantitatively examine trends of simulation

Validation of Walking determinants

Validation of Santos: Example: Box-Lifting

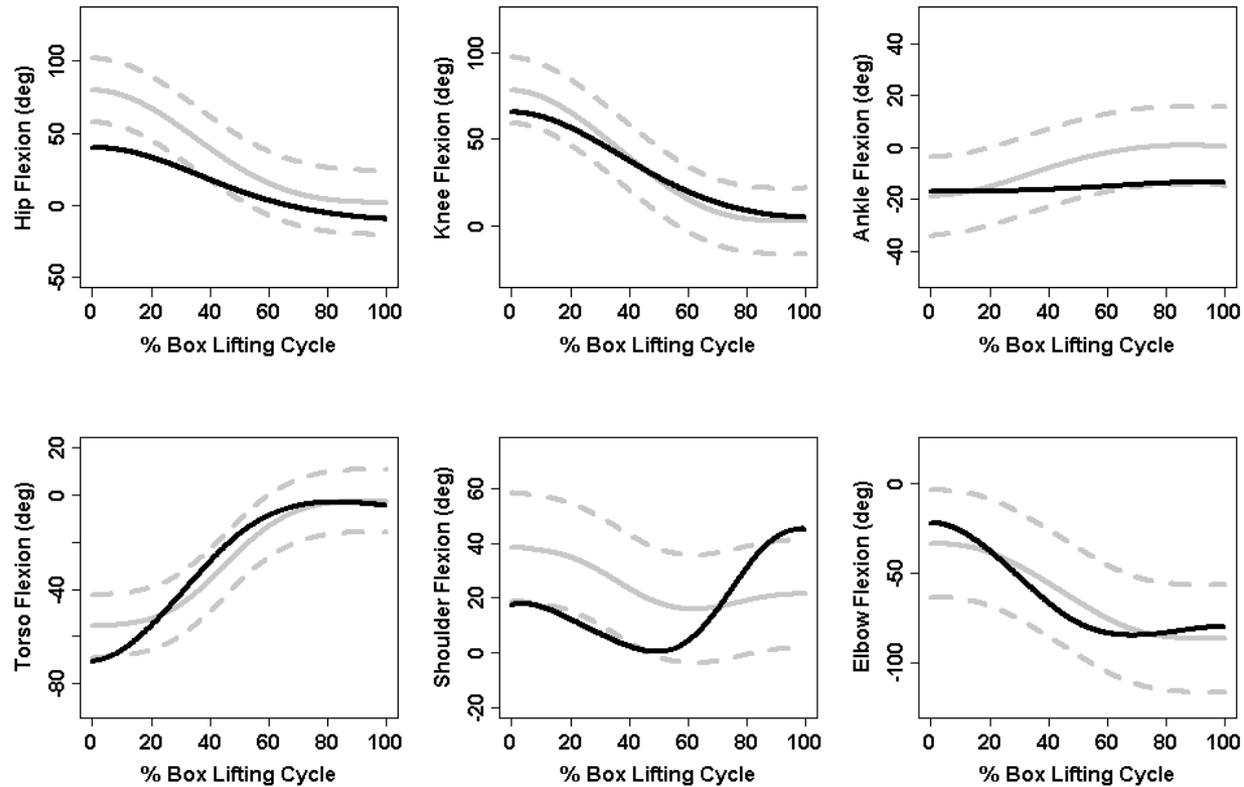

Experiment

Simulation

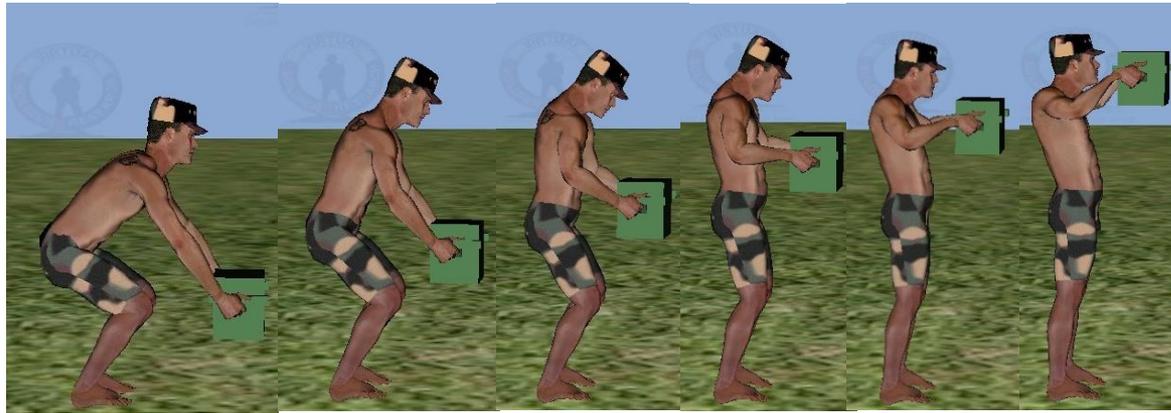

Validation of Santos: Box-Lifting determinants

Validation of box-lifting determinants

Validation of Santos: Key-Frames ANALYSIS

(Challenging Applications (ETOWL Examples))

Jumping From A Box

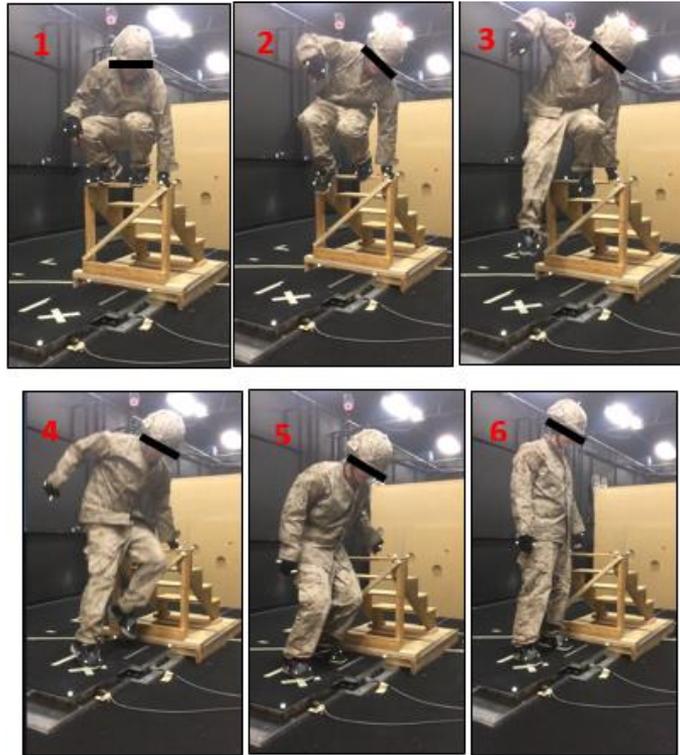

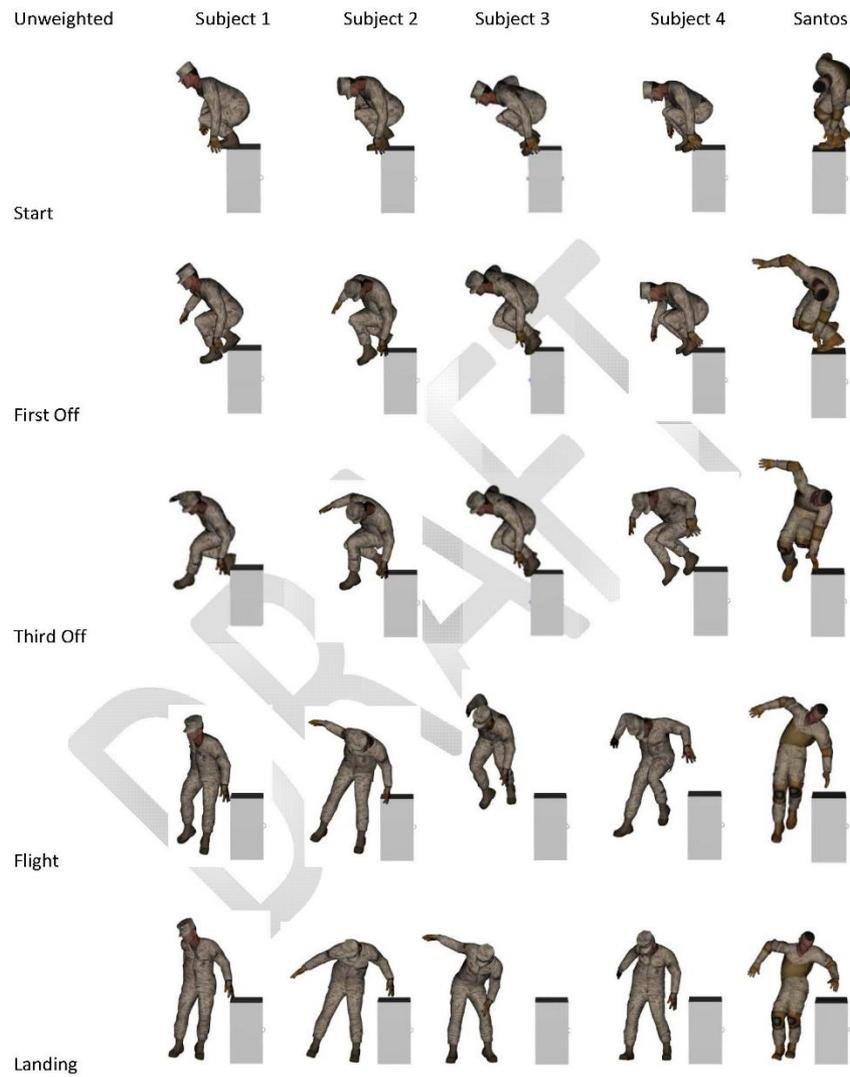

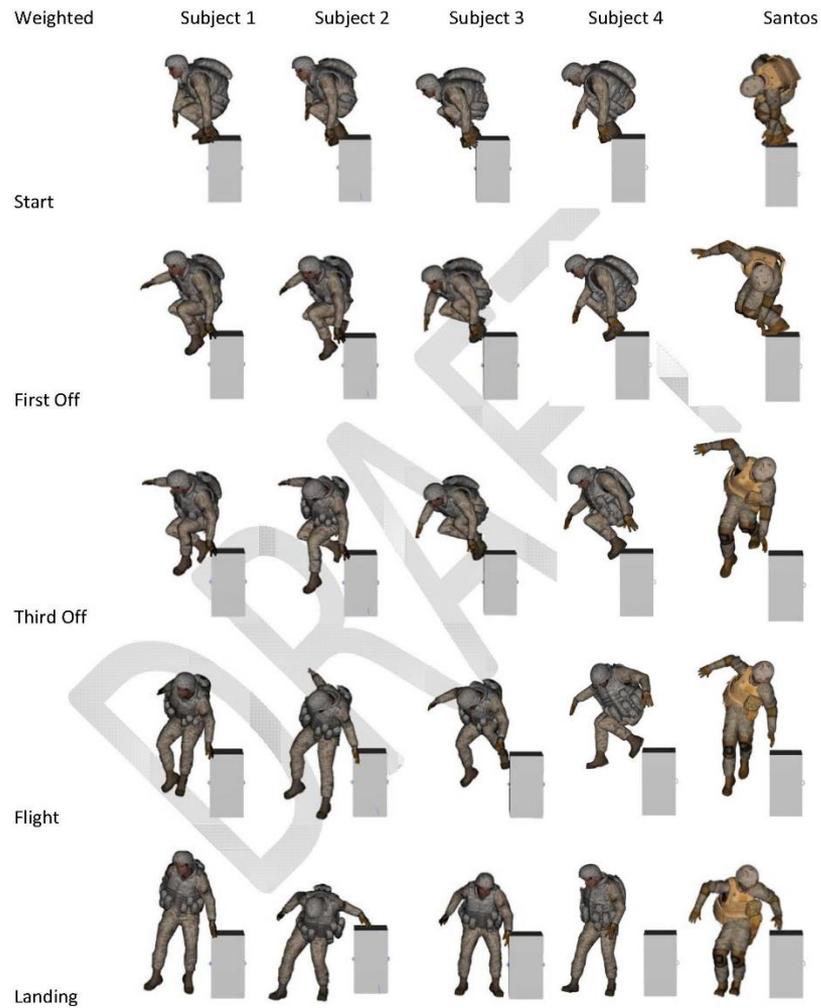

Figure 2 –Subject performs an RFF jumping-from-a-box cycle: 1) Start, 2) Right Foot Off (RFO), 3) Left Foot Off (LFO), 4) Hand Off (HO), 5) Landing (LD), and 6) Final Pose (FP).

Jumping From A Box

Z-SCORE

This score takes the difference in the mean of the subjects' joint angles and Santos's predicted angles and divides by the standard deviation of the subjects, measuring how many standard deviations Santos is away from the mean.

Thank You!
