THE UNIVERSITY OF IOWA

Presentation Outline

- Current Hand Capabilities
- Ongoing Hand Research
- Future Work

Current Capabilities

- ✓ Biomechanical Model
 - Right Hand
 - Left hand
- ✓ Graphical Interface
 - Scalable Anthropometry
- ✓ Photorealism (and Skin deformation)
- ✓ Grasping (16 power and precision grasps)
- ✓ Grasp Morphing (changing of grasping from one to another)

- ✓ Manipulation (individual joints, or coupled joints)
- ✓ Forward Kinematics
- ✓ Joint Torque Analysis
- ✓ Reach Envelopes of each Finger

Ongoing Research

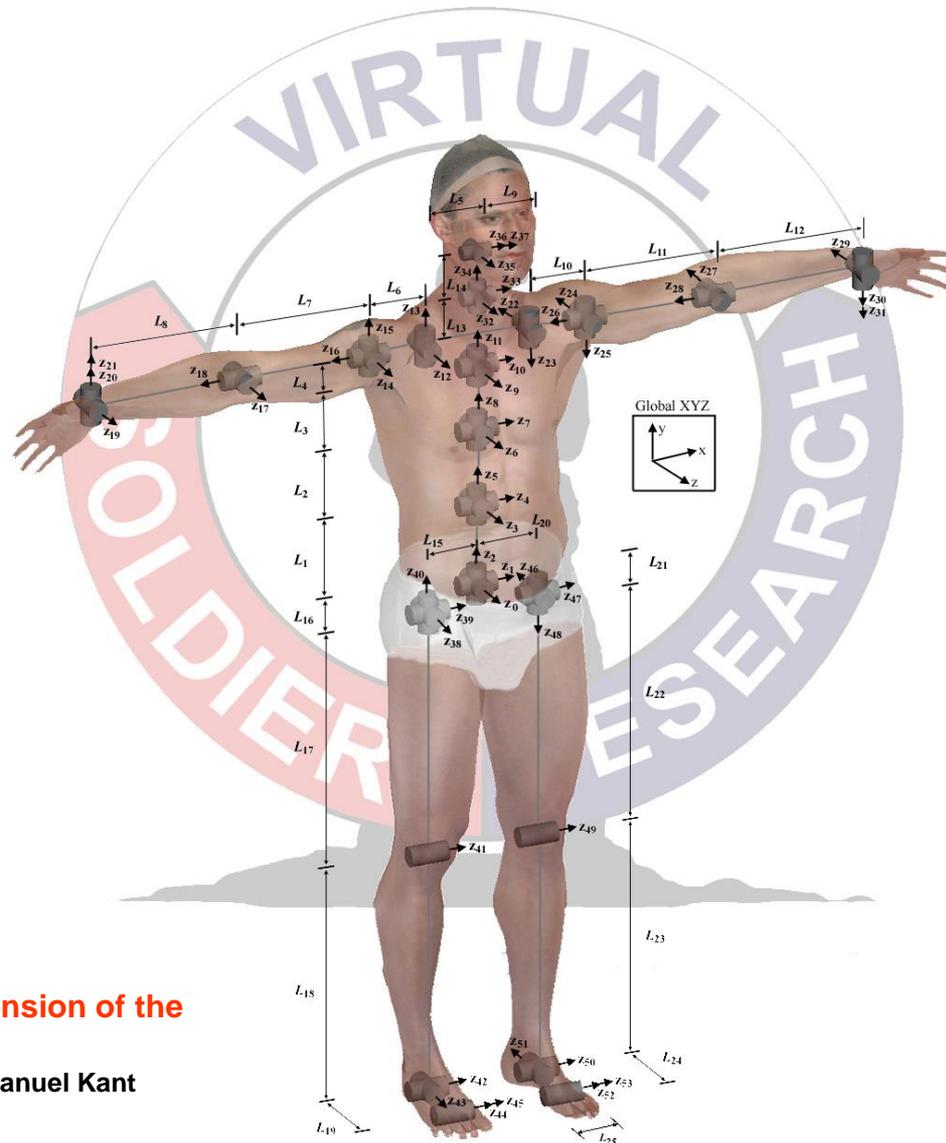

- ✓ Graphical Interface
- ✓ Finger Pressure
- ✓ Finger Wrapping
- ✓ Grasping Quality Calculation

Future Work

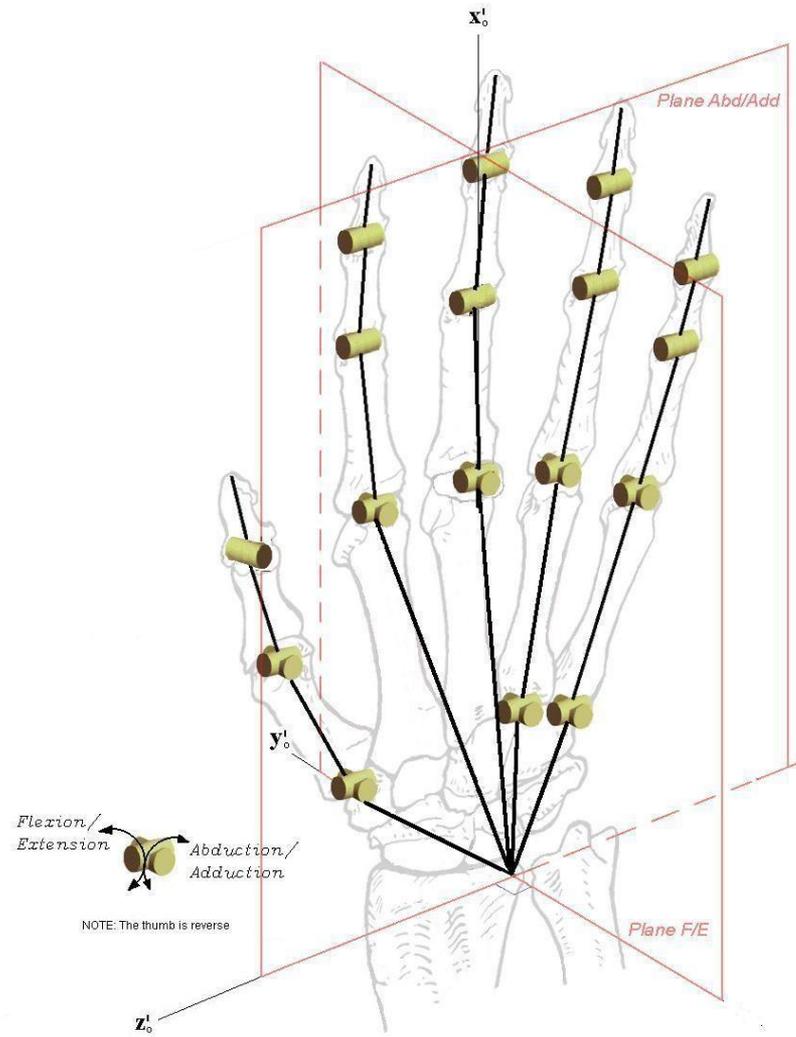

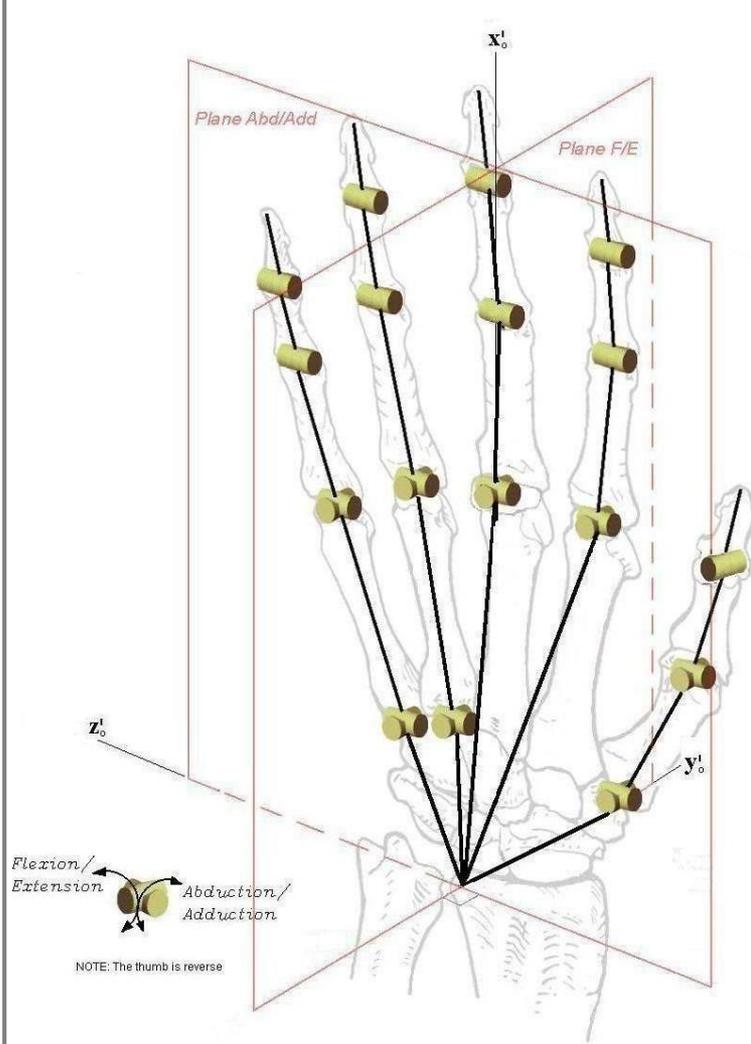

- ✓ Validation
- ✓ Grasp Artificial Intelligence
- ✓ Local Biomechanics wrist and hand modeling
- ✓ Compliant Pressure Mapping
- ✓ Evaluation of Carpal Tunnel Pressure
- ✓ Dexterity Analysis

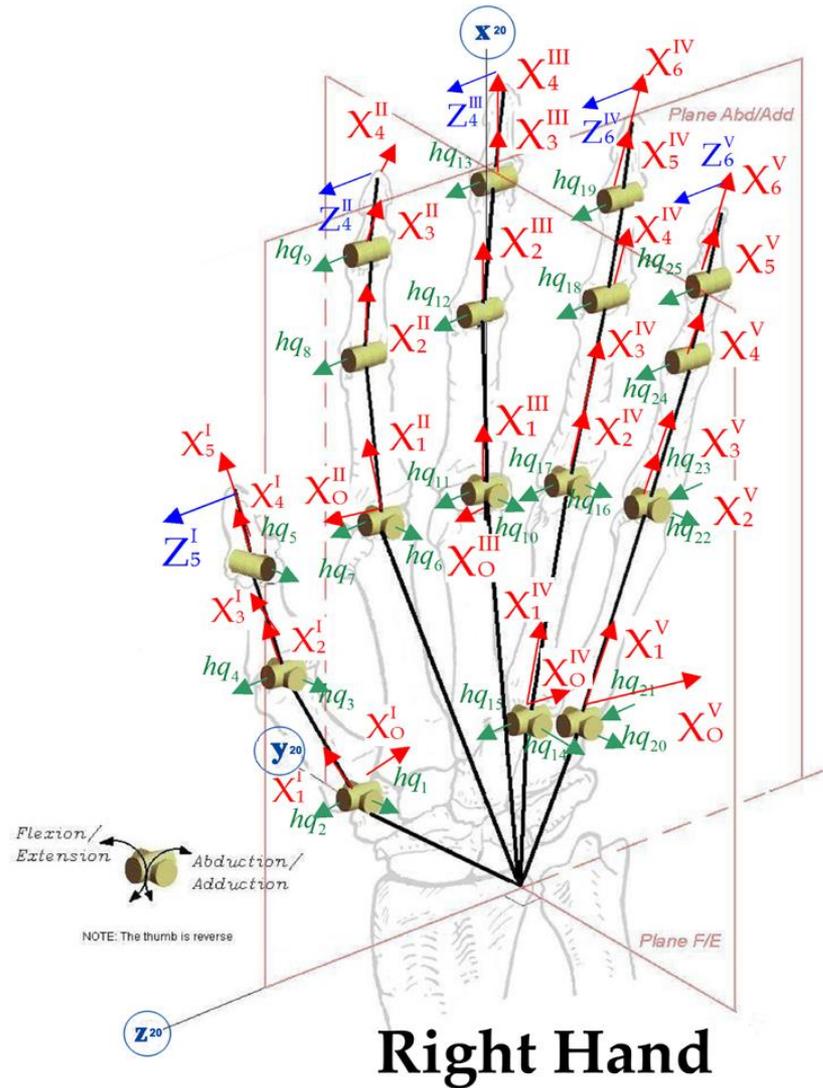

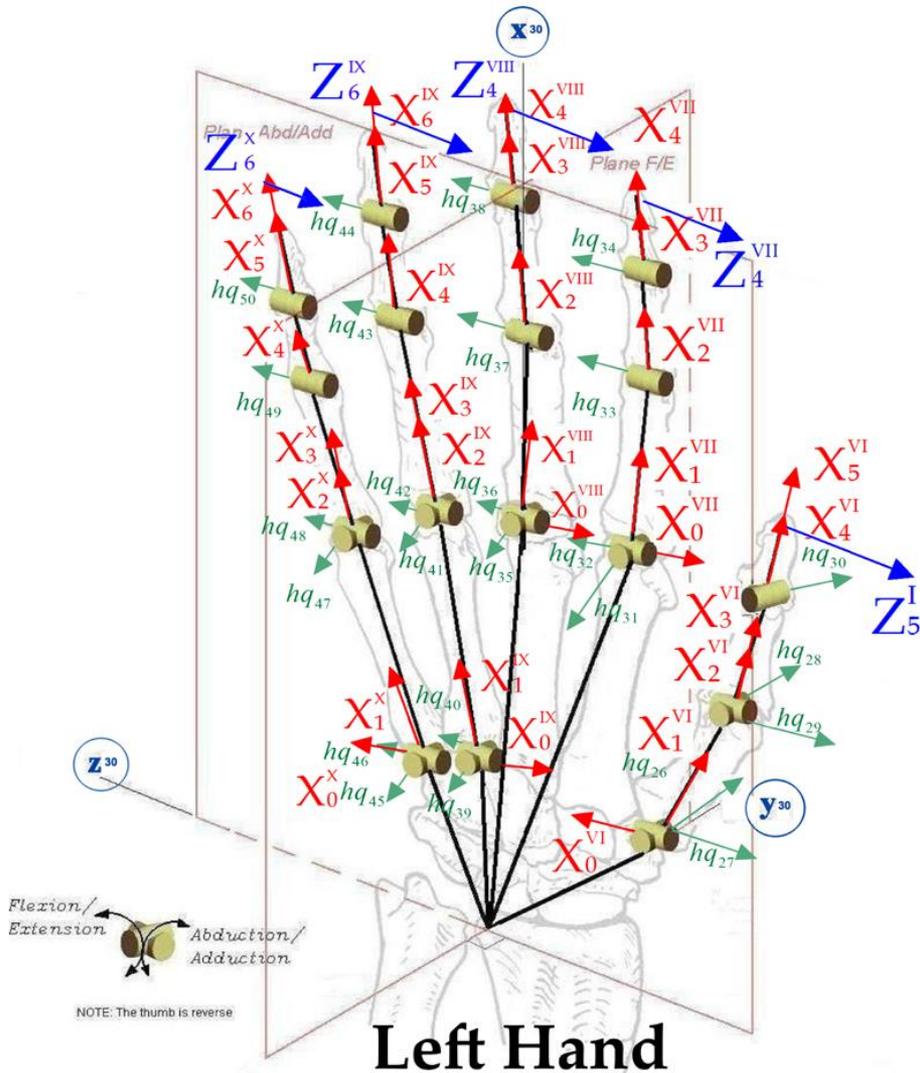

The hand is an extension of the human brain

Immanuel Kant

Joint Limits - Hand

Adjust Joint Limits

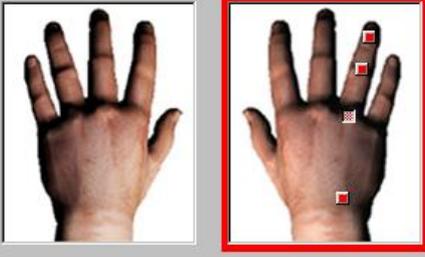

Apply to

- Left Hand
- Right Hand
- Both Hands

Select a Digit

Ring

Select a Joint

Reset Default Limits (This Joint)

Reset Default Limits (All Joints)

Save Current Joint Limits As

X Limits: 80

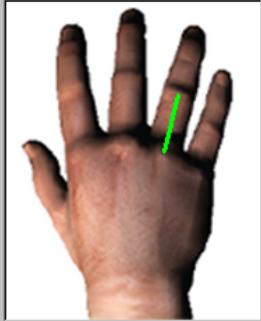

Y Limits: 20

X Range: 19

Y Range: 0

Link Lengths - Hand

Adjust Link Lengths

HL 200

90 HB

Length (mm) 200

Breadth (mm) 90

Reset to Default

Apply to

- Left Hand
- Right Hand
- Both Hands

Select a Digit

Ring

Link Lengths (mm)

Distal Phalangeal: 21.4 mm

Middle Phalangeal: 33 mm

Proximal Phalangeal: 60.81 mm

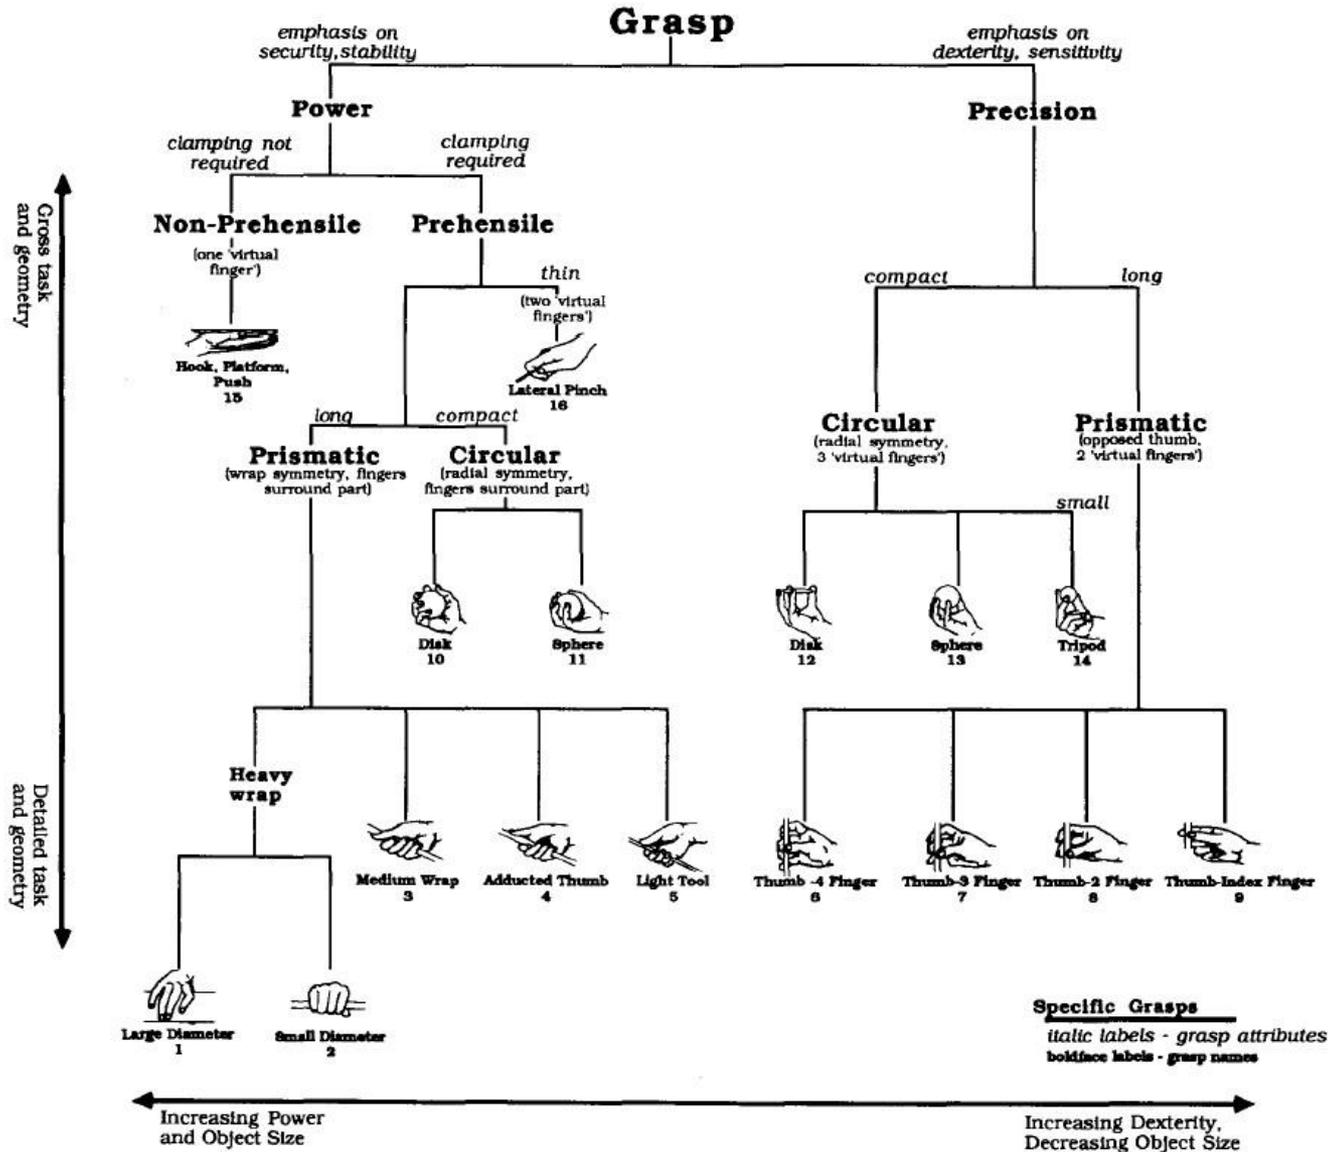

Metacarpal: 67.56 mm

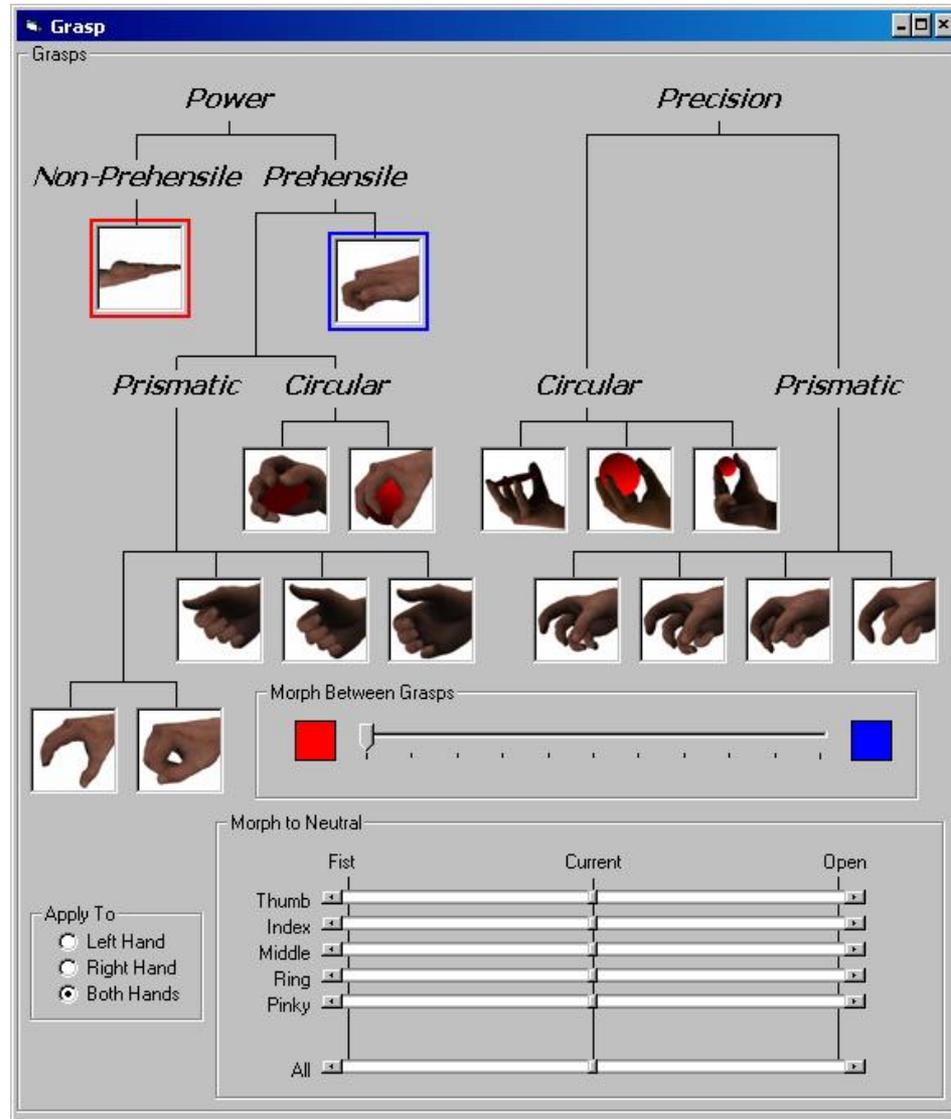

Reset All Links to Default

Load Link Lengths

Optimization-based method

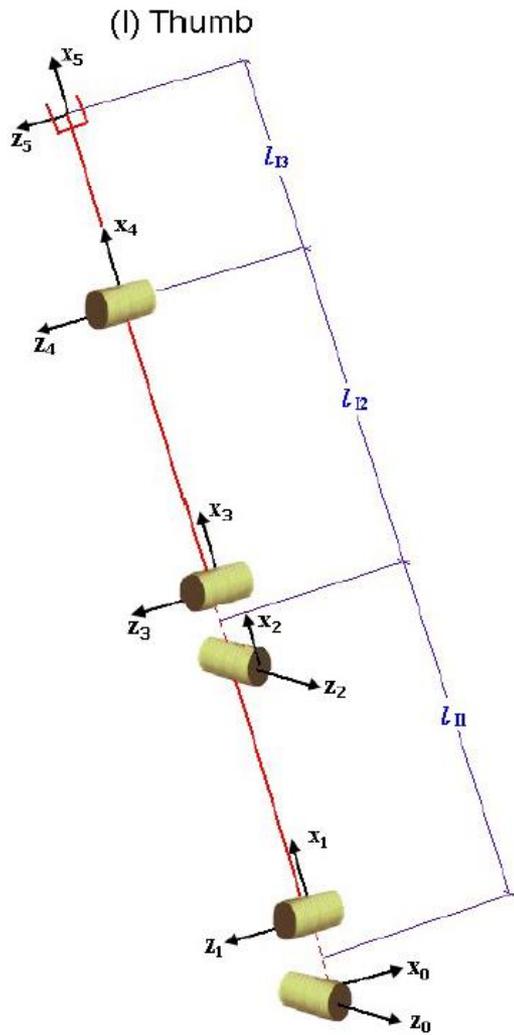

Find: \mathbf{q}^i

Minimize: $f_d = \sum_{i=1}^n w_i |q_i - q_i^N|$

Subject to: $q_j^{iL} \leq q_j^i \leq q_j^{iU}$

$\|\mathbf{p}^i - \mathbf{x}^P\| = 0$

	θ_i	d_i	a_i	α_i
1	$q_1 + \frac{\pi}{2}$	0	0	$-\frac{\pi}{2}$
2	q_2	0	l_{I1}	$\frac{\pi}{2}$
3	q_3	0	0	$-\frac{\pi}{2}$
4	q_4	0	l_{I2}	0
5	q_5	0	l_{I3}	0

D-H Table

	Min.	Max.
q_1	0	60
q_2	-25	35
q_3	0	60
q_4	-10	55
q_5	-15	80

Range of motion

95% Male HB=90 mm, HL=190 mm

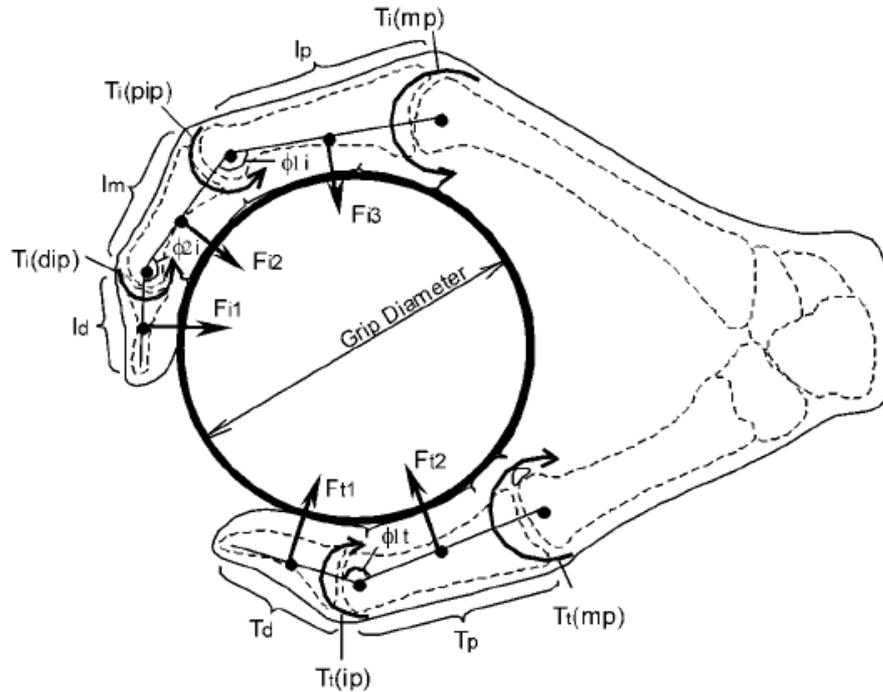

Two views of workspace for thumb

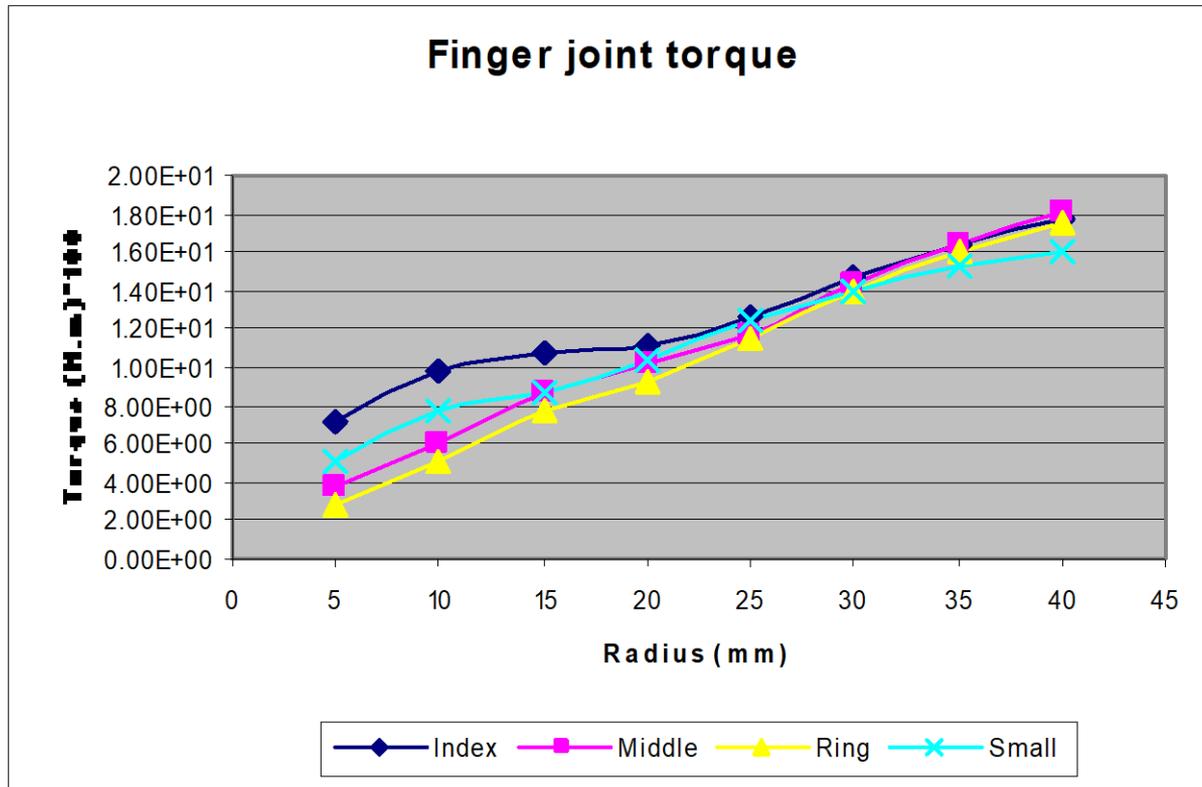

$$\boldsymbol{\tau} = \sum_k \mathbf{J}_k \mathbf{T}_k \mathbf{F}_k$$

Where

$$\boldsymbol{\tau} = [\tau_1, \tau_2, \dots, \tau_n]^T$$

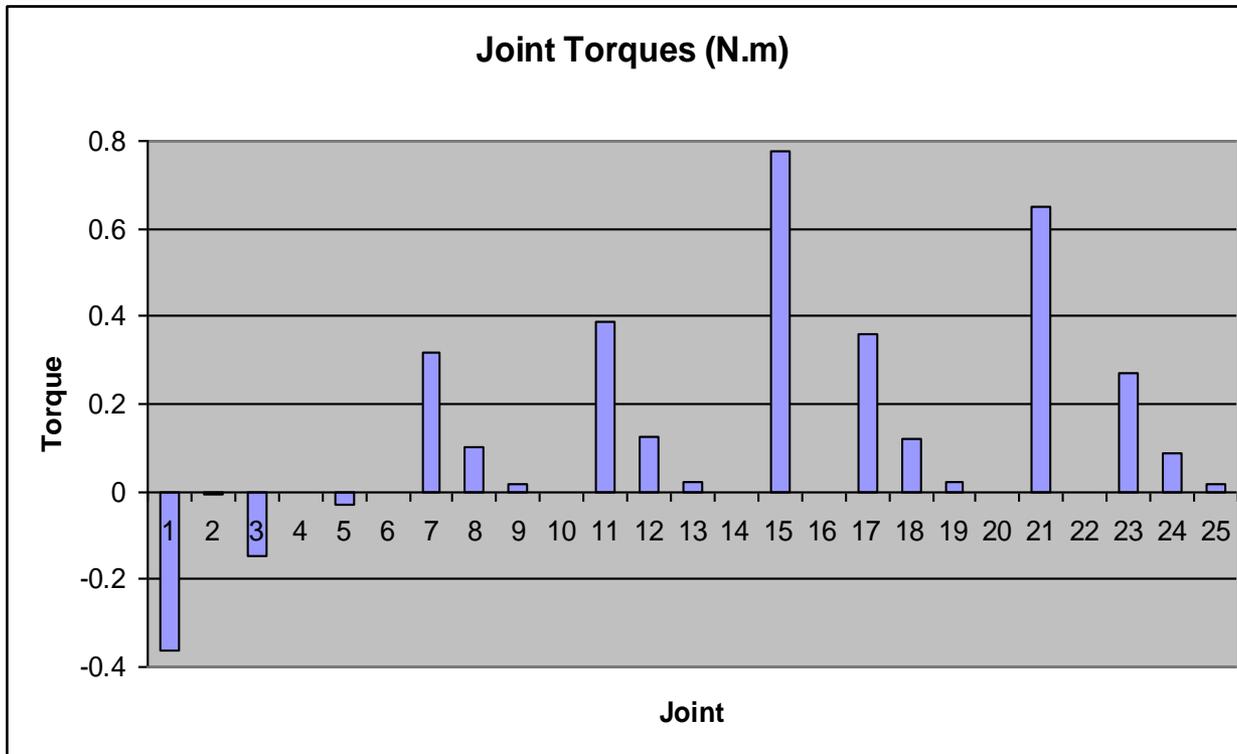

$$\mathbf{J}_k(\mathbf{q}) = \begin{bmatrix} \frac{\partial {}^0 \mathbf{T}_1(\mathbf{q})}{\partial q_1} \mathbf{r}_k & \dots & \frac{\partial {}^0 \mathbf{T}_i(\mathbf{q})}{\partial q_i} \mathbf{r}_k & \dots & \frac{\partial {}^0 \mathbf{T}_k(\mathbf{q})}{\partial q_k} \mathbf{r}_k \\ \mathbf{Z}_0(\mathbf{q}) & \dots & \mathbf{Z}_{i-1}(\mathbf{q}) & \dots & \mathbf{Z}_{k-1}(\mathbf{q}) \end{bmatrix}_{6 \times k}$$

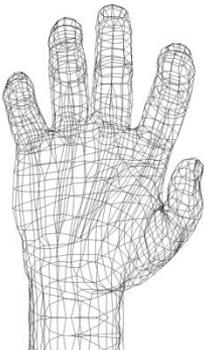

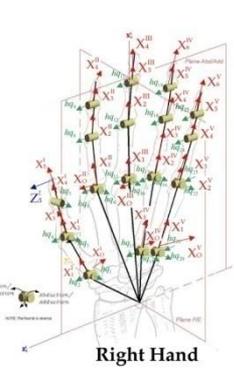

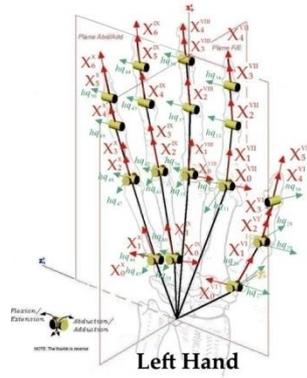

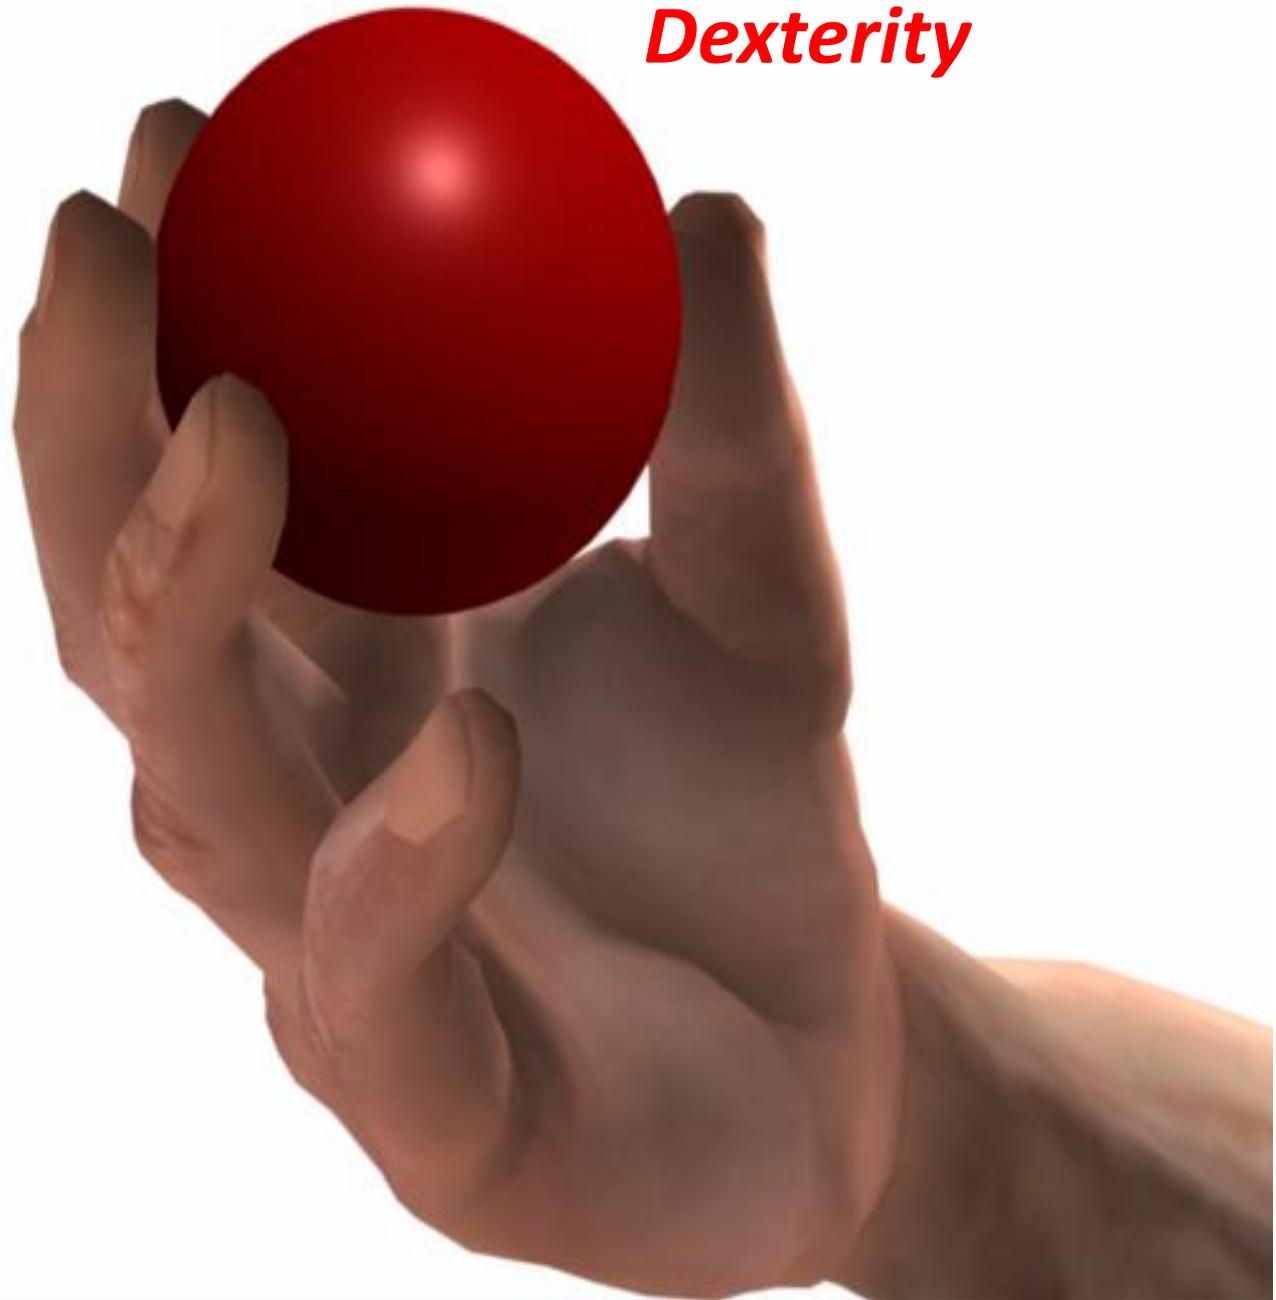

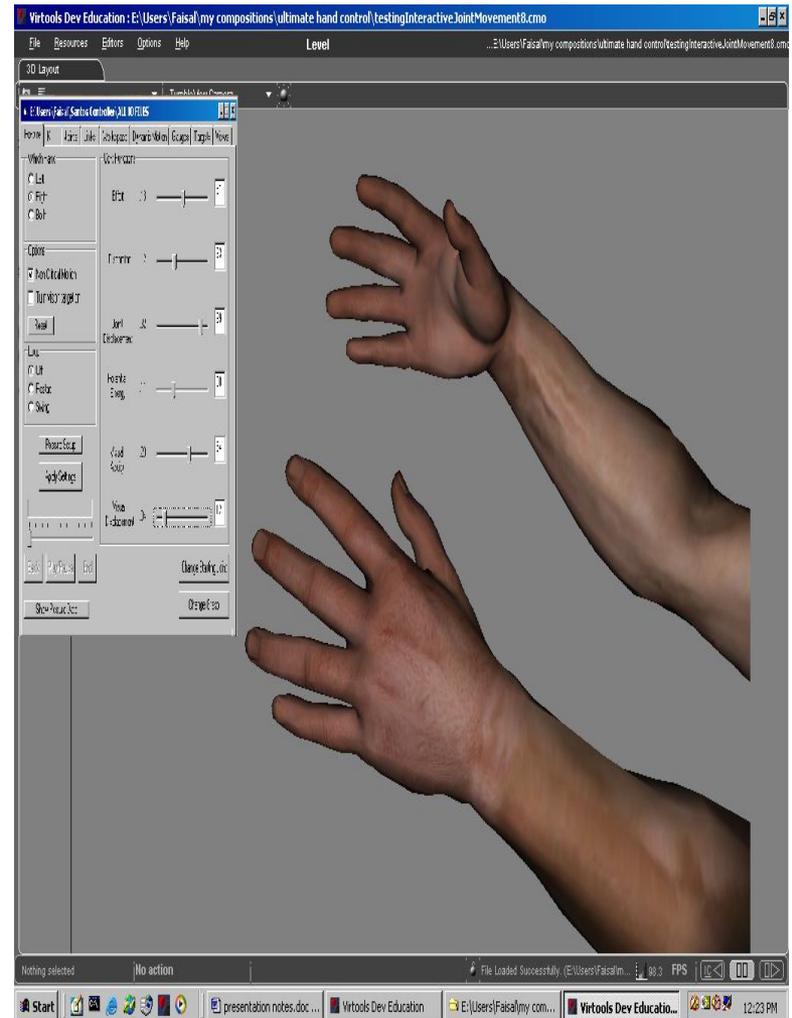

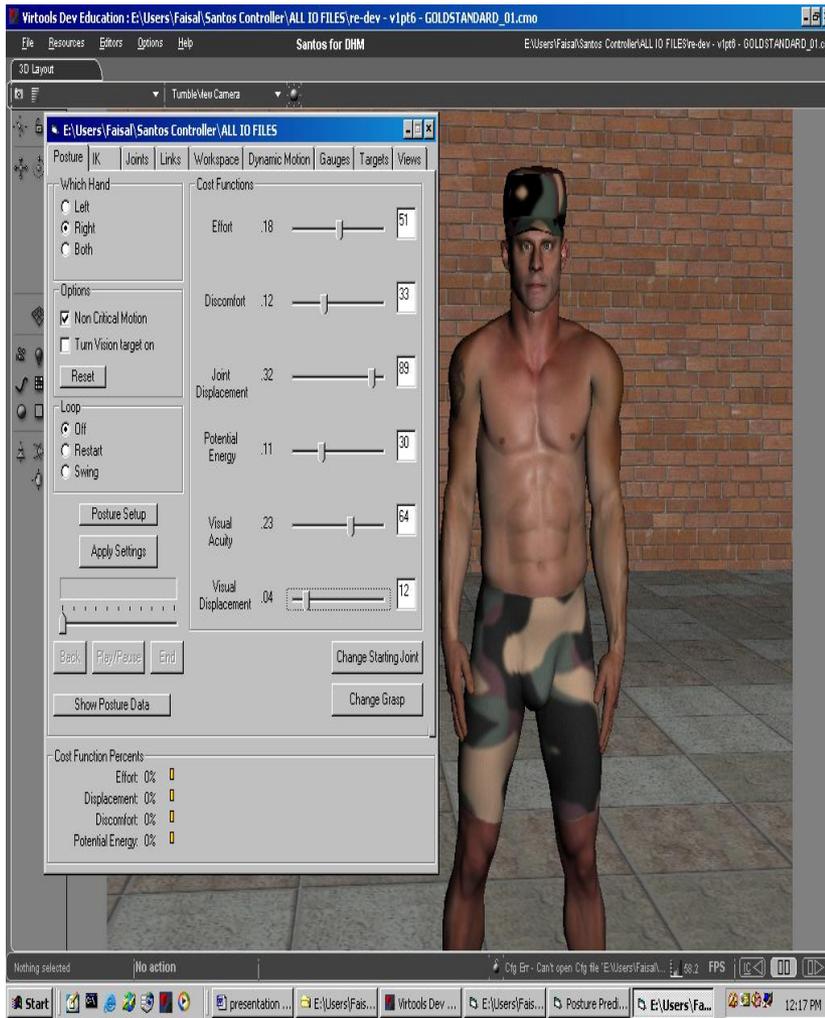

Contact force for each segment is 1N

Dexterity

Recursive method:

$$\tau_1^n = f_1(q_1, q_2, \dots, q_n, F_n)$$

$$\tau_2^n = f_2(q_1, q_2, \dots, q_n, F_n)$$

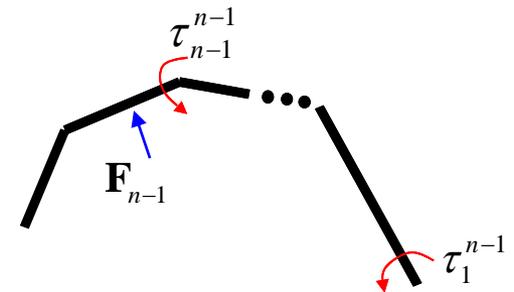

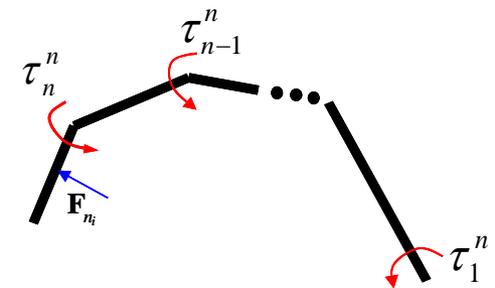

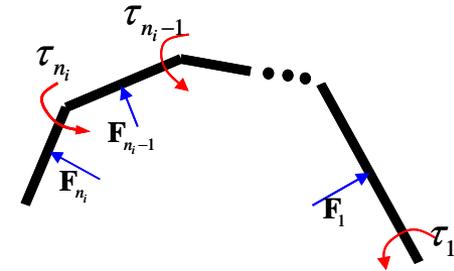

...

$$\tau_n^n = f_n(q_1, q_2, \dots, q_n, F_n)$$

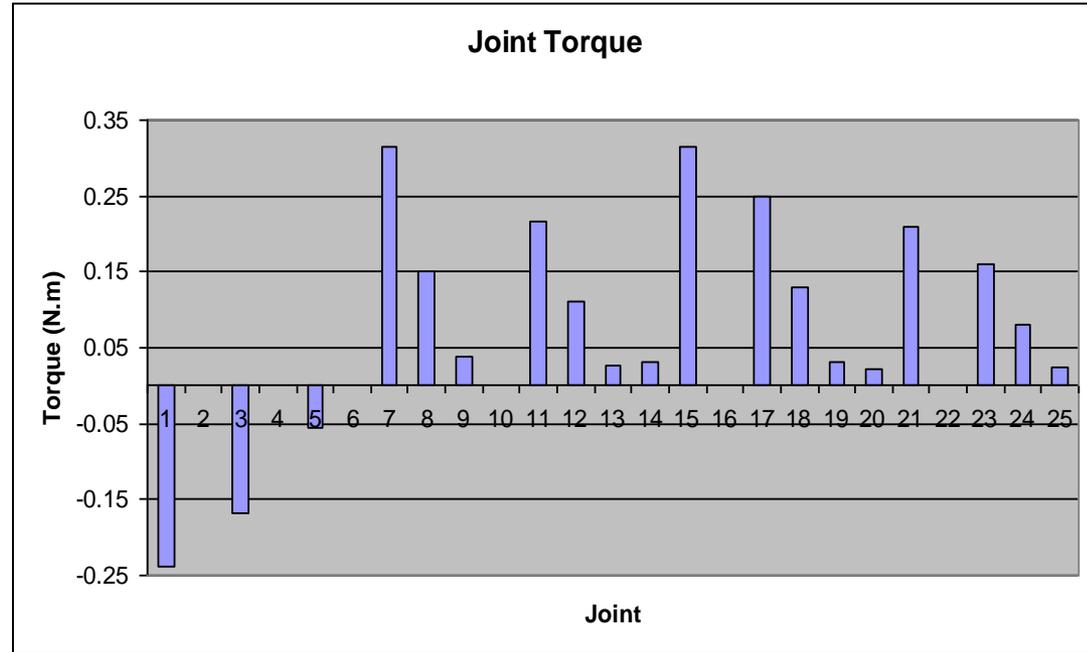

Given one of $\tau_1^n \dots \tau_n^n$

Solving above equations to find the rest of τ_i^n
and F_n

Repeat the above procedure to find all other
finger pressures

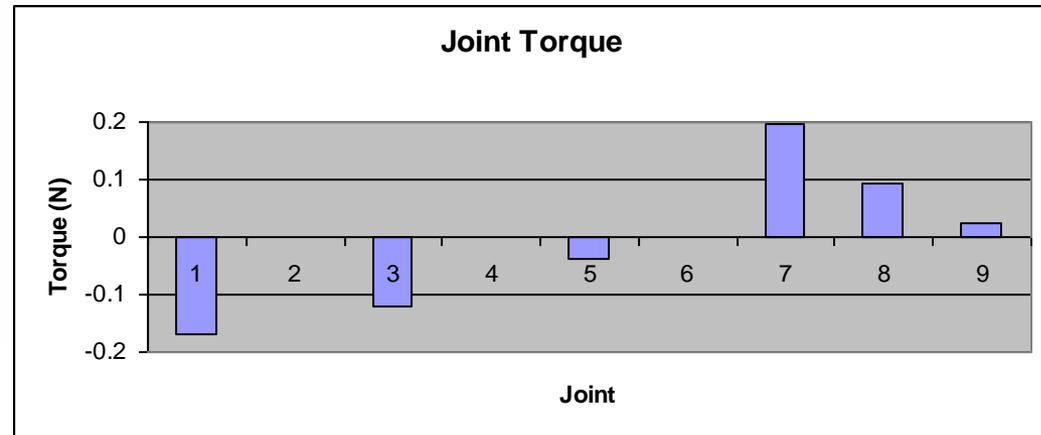

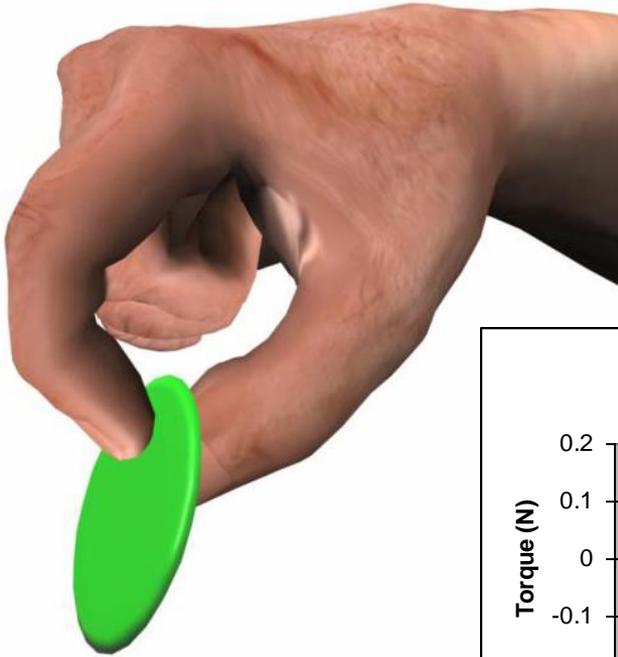

Finger Pressure

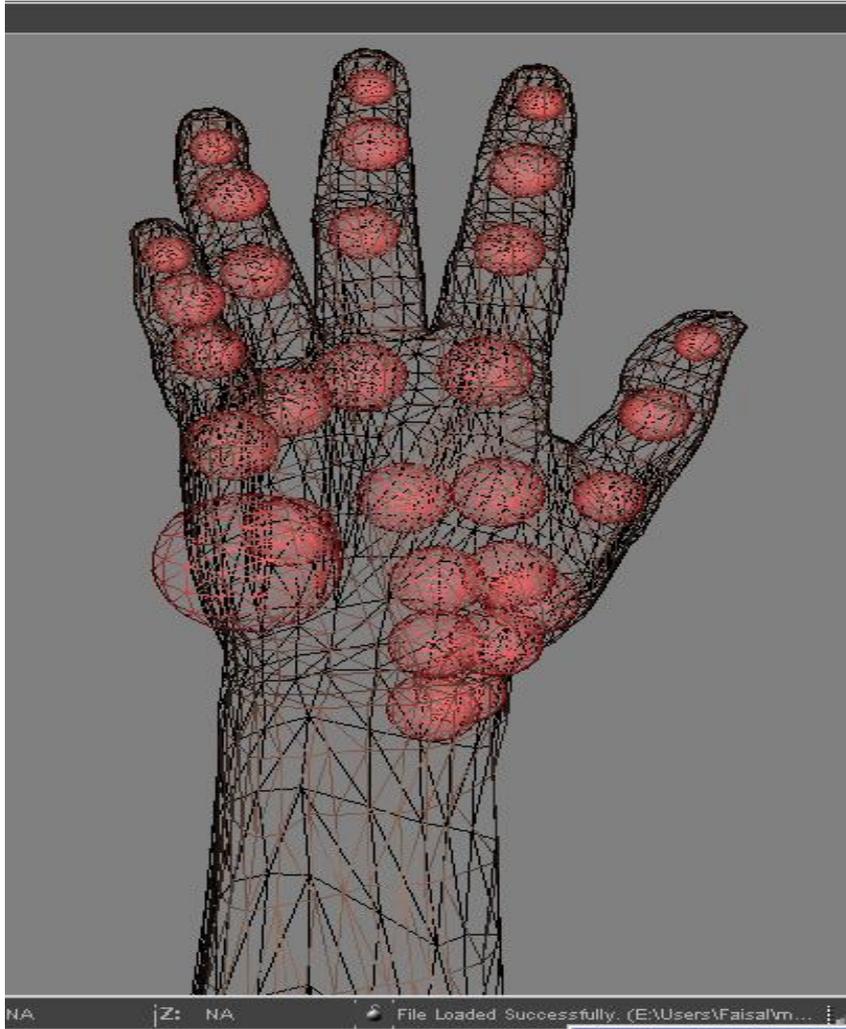

Finger contact forces: 3.5N, 4.0N, 2.5N, 3.0N, and 2.5N

Finger Pressure

Finger contact forces: 2.5N, and 2.5N

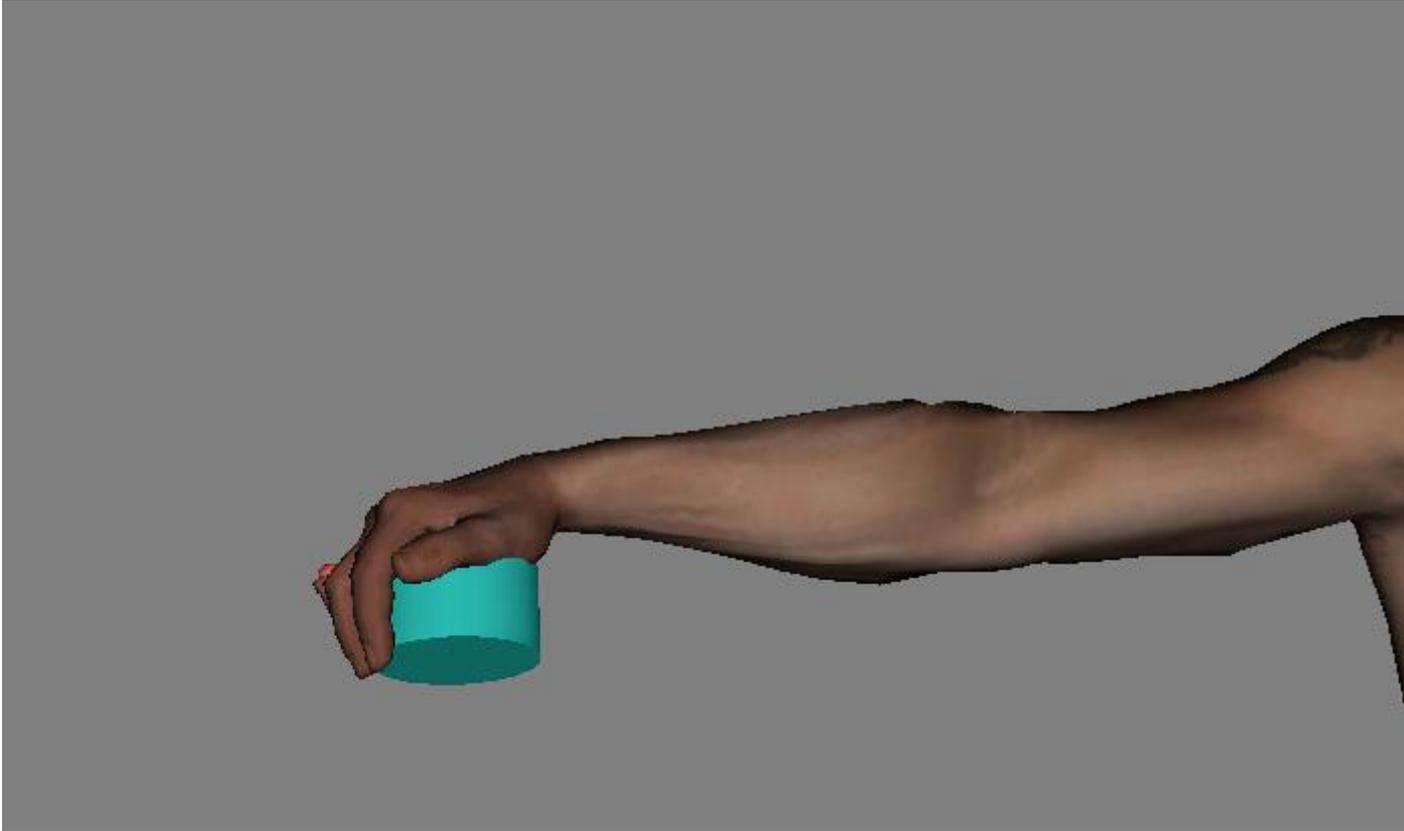

Spherical Sensors

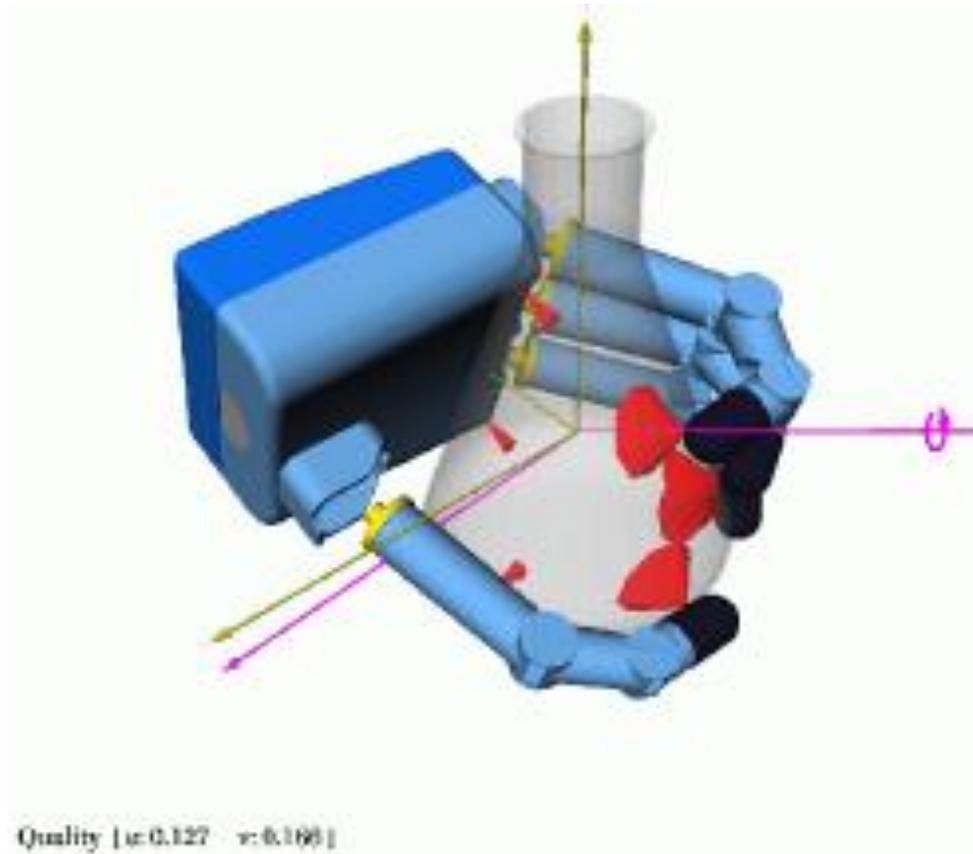

- **Simplified Collision Detection**

- **Finger Wrapping**

Finger Wrapping

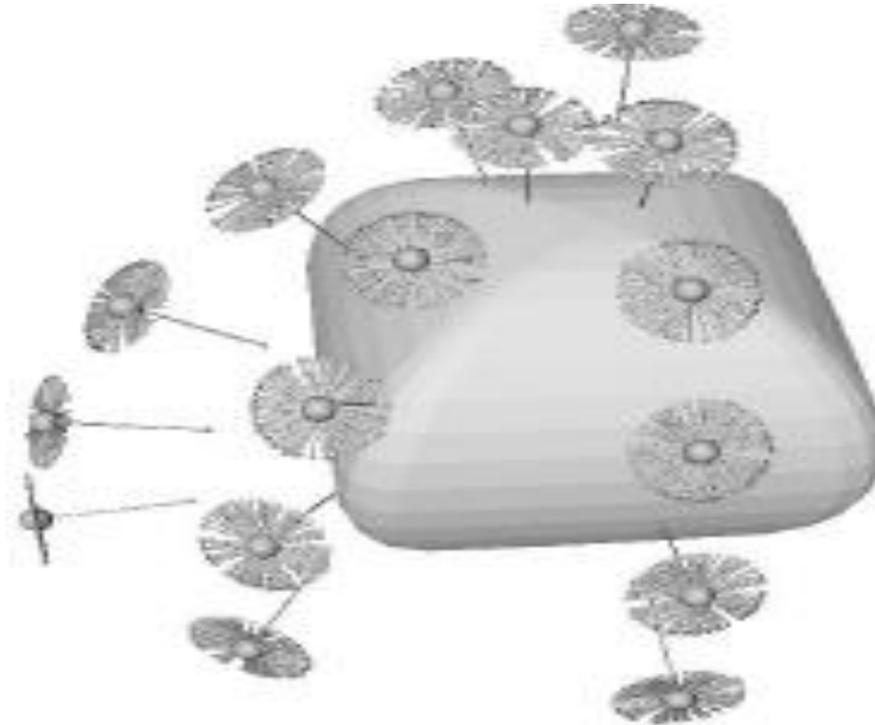

Given : Object Model, Hand Model, Grasp

Find : The quality of the grasp

- **Given** : Object Model, Contact points

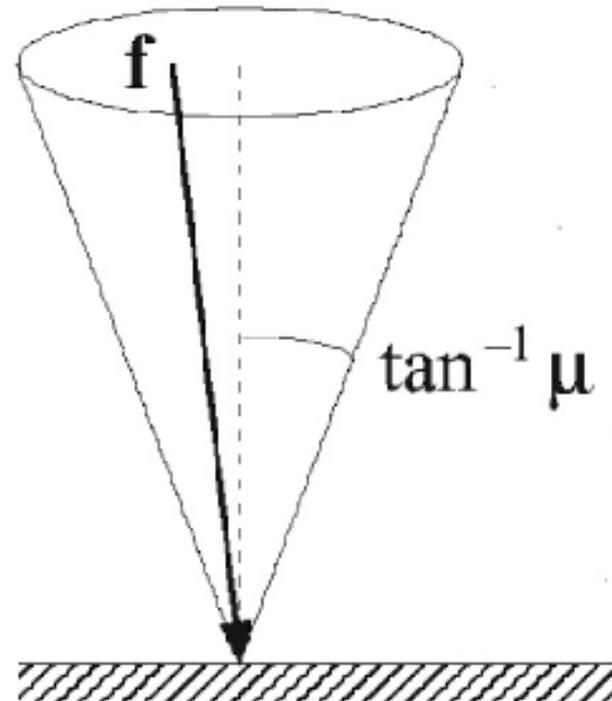

- **Find**: Space of forces and torques that can be exerted on the object

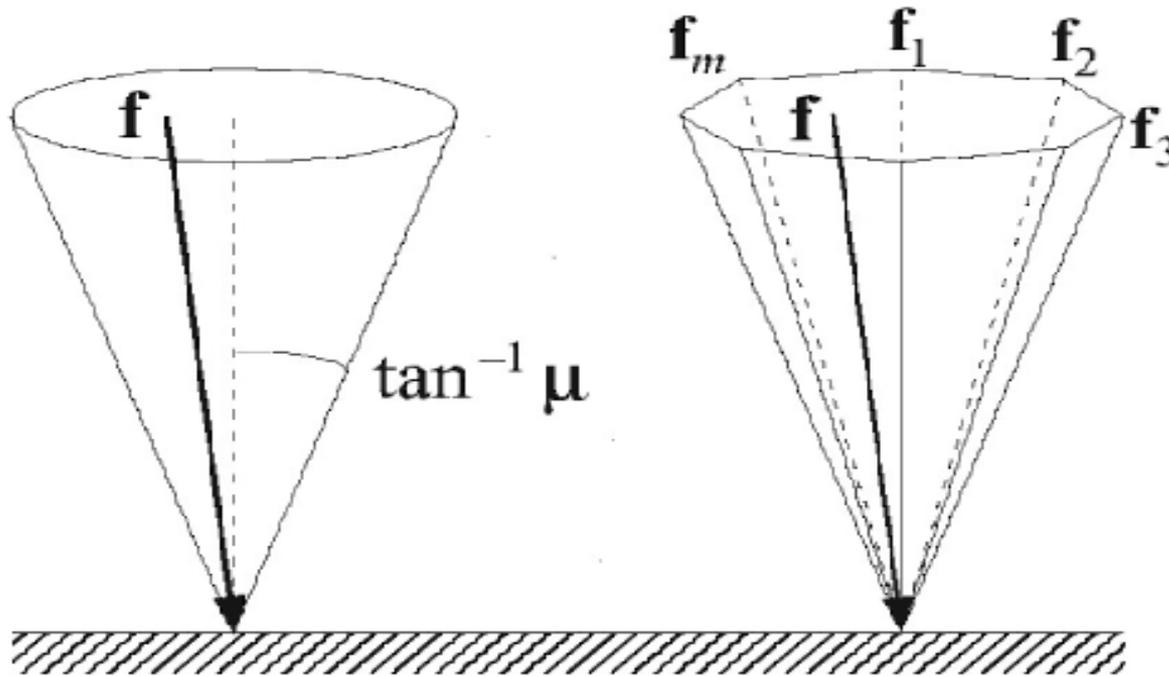

Constraints:

- Can exert both tangential and normal forces.

- Fingers must not slip !

Linear FC Approximation

For $m = 4 \rightarrow 30\%$ error

For $m = 8 \rightarrow 8\%$ error

Mathematics

$$w_i = \begin{pmatrix} f_i \\ D_i \times f_i \end{pmatrix} \quad \text{Definition of a wrench (6dimensional)}$$

$$\sum_{j=1}^{j=m} \alpha_j \cdot f_j \quad \text{Friction Pyramid Approximation}$$

$$W = \left\{ w \mid w = \sum_{i=1}^n \sum_{j=1}^m \alpha_{ij} \cdot w_{ij} \right\}$$

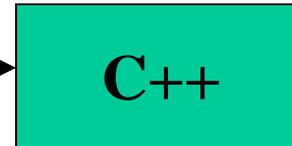

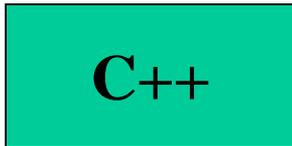

$$W_{L1} = \text{ConvexHull} \left(\bigcup_{i=1}^n \{ w_{i1}, w_{i2}, \dots, w_{im} \} \right)$$

Implementation

- Normals
- Contact points
- COM

Quality

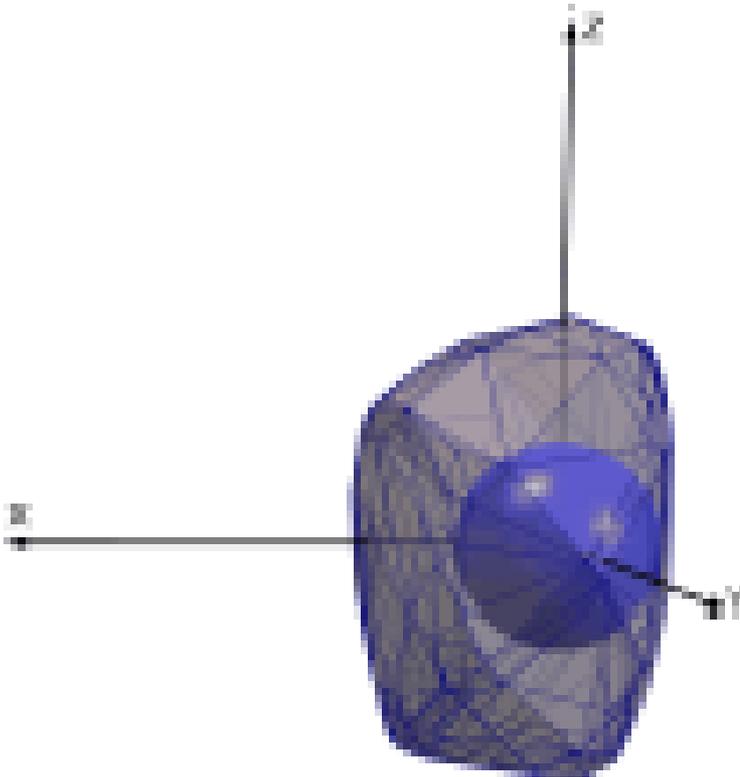

- Friction Cones
- Compute wrench space
- Assume COF

- Convex Hull Computation
- List of planes

- Compute quality from list of planes

What Do they Mean in Reality ?

Measure#1 :

Radius of inscribed sphere

Measure#2 :

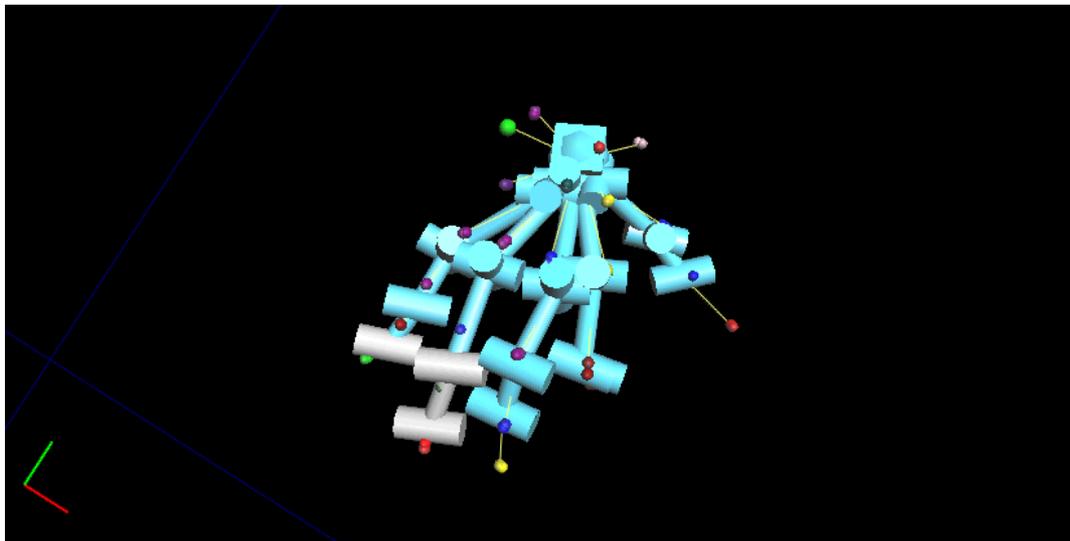

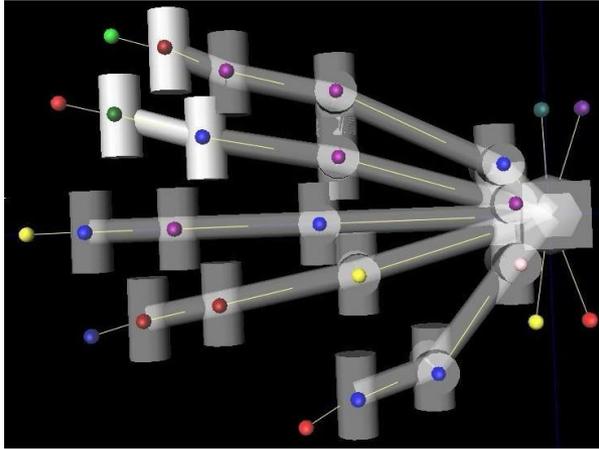

The volume of the convex hull

3D Force-Space Projection of Original 6D Hull

Future Work

- ✓ Validation
- ✓ Evaluation of Carpal Tunnel Pressure
- ✓ Grasp Artificial Intelligence
- ✓ Local Biomechanics wrist and hand modeling
- ✓ Compliant Pressure Mapping
- ✓ Dexterity Analysis

Carpal tunnel syndrome

Cost function:

Pronation/supination angles

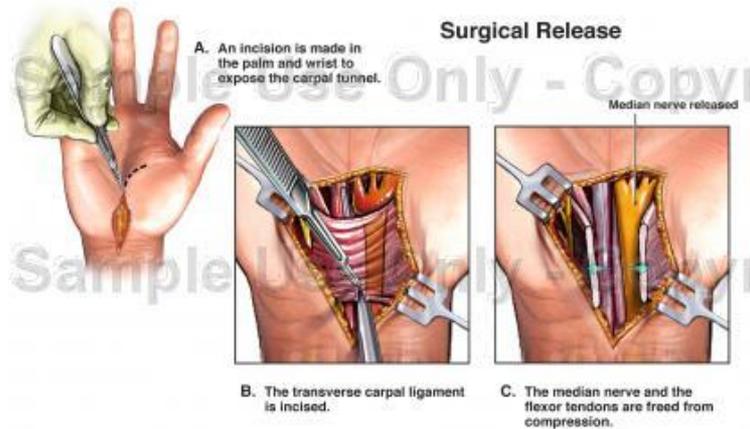

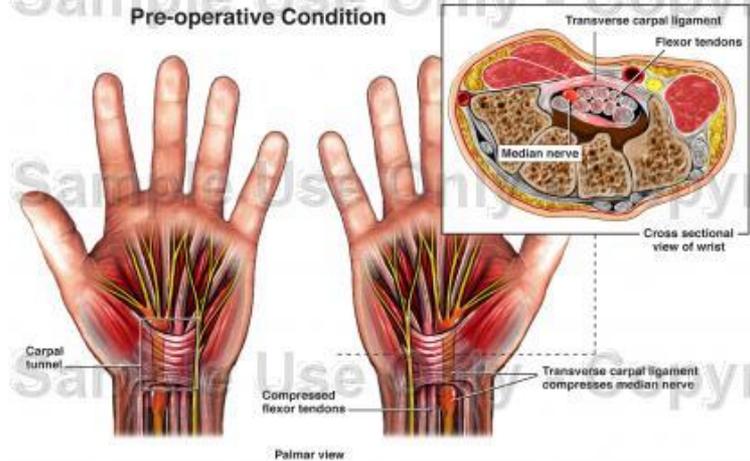

Metacarpophalangeal (MP) angle

Wrist angles (flexion/extension)

Wrist angles (radial/ulnar)

Fingertip loads

Bilateral Carpal Tunnel Syndrome with Surgical Release
Pre-operative Condition

Future Goals

**Grasp
Quality**

Learning

- Pattern Recognition
- Neural Nets

Optimization

- Maximize Quality
- Constraints

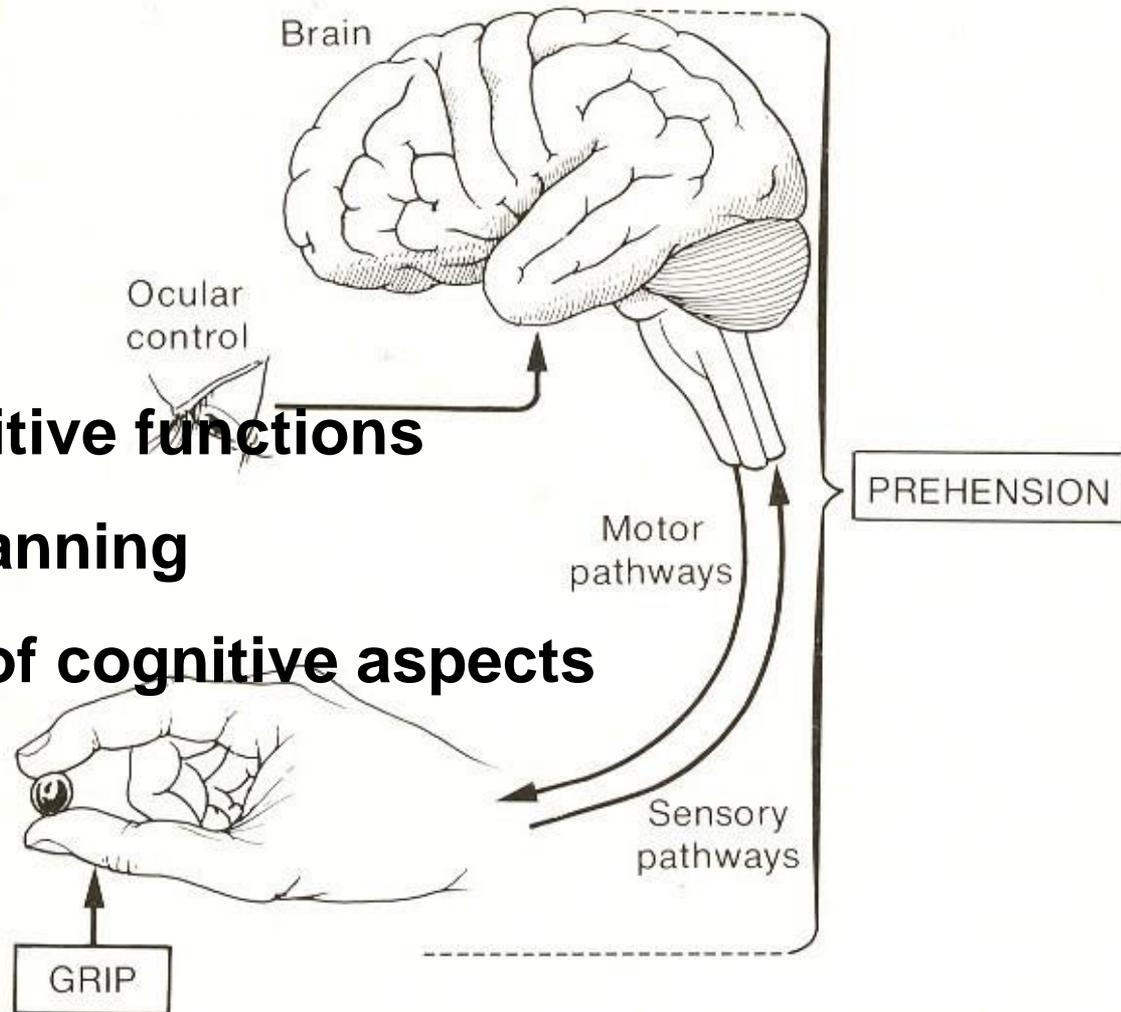

Cost Function for the Hand Model

- 1) **Biomechanical Model**
 - 4) **Forward Kinematics**
 - 16) **Graphical Interface**
 - 3) **Photorealism (and Skin deformation)**
 - 5) **Manipulation (individual joints, or coupled joints)**
 - 6) **Grasping (16 power and precision grasps)**
 - 7) **Grasp Morphing (changing of grasping from one to another)**
 - 8) **Grasp Artificial Intelligence**
 - 9) **Finger Pressure**
 - 10) **Joint Torque Analysis**
 - 12) **Local Biomechanics wrist and hand modeling**
 - 13) **Compliant Pressure Mapping**
 - 11) **Reach Envelopes of each Finger**
 - 14) **Evaluation of Carpal Tunnel Pressure**
 - 15) **Dexterity Analysis**
